I. Introduction

This manual contains information and state policies on accommodations and accessibility features for the five assessments that comprise the Rhode Island State Assessment Program (RISAP). Each assessment is slightly different in what are and are not appropriate test supports for students. IEP/504 teams and EL teams should read this manual carefully to ensure that they select the most effective test supports. Any support provided to a student should mitigate the student's challenges as much as possible and provide the greatest amount of access to the state assessments they take. Accommodations and accessibility features should support a student's independence so they can show what they know on our state tests.

In addition to this manual, several of the state assessments have additional accommodations and accessibility manuals that explain how to administer a test using the accommodation and any technical issues that to address prior to testing. In addition to this manual, you will need:

- ACCESS: WIDA Accommodations and Accessibility Features Manual
- **DLM:** DLM Accessibility and Accommodations Manual
- RICAS:
 - Guide to the Student Registration/Personal Needs Profile (SR/PNP) Process
 - o Guidelines for Using Assistive Technology as a RICAS Test Accommodation
- NGSA:
 - Accommodations and Accessibility Features Manual
 - NGSA TIDE User Guide
 - NGSA Assistive Technology Manual
- SAT and PSAT 10:
 - Accommodations and Supports Handbook
 - Accommodated Testing Manual
 - SSD Coordinator Guide

All documents and other test-specific resources can be found at www.ride.ri.gov/accommodations

Test Support Categories

Test supports are divided into two categories depending on whether all students can use them, if they are for a student with a disability, or if they are designed for a student in the process of learning English.

- 1. **Accessibility Features**: can be used on either the computer- or paper-based test and may be used by any student. All of the flexible test administration procedures may be used with *any* student, at the discretion of the principal (or designee).
- 2. **Accommodations**: are available to students with disabilities and/or English learners. Teams and educators responsible for developing Individualized Education Programs (IEPs) and 504 plans must make decisions regarding accommodations, and these must be listed in the plan of each student. We encourage LEAs to list accommodations for EL students using the sample form in this document, though this is not required.
 - **Special Access Accommodations (RICAS only)**: These accommodations can be only used by students who meet certain guidelines and criteria.
 - State-Allowed Accommodations (PSAT 10 and SAT only): Use of these accommodations will result in scores that are non-reportable. This means test scores cannot be used for

college admissions purposes. However, scores will be used by RIDE for accountability and assessment reporting and students will receive individual score reports.

Navigating the table of test supports

Test Support Name: The name

Student Status: Tells which students are eligible to use this test

- use this test support.
- IEP/504 Only designate test supports only for students with

External or Non-Embedded Support: This column provides information what the support is, any criteria or requirements a student must meet paper-based tests.

- We are required to monitor accommodations use across tests so any information on recording the accommodation is also provided.

Test Support Name	Test	Student Status	Support Group	Embedded Support Use information in this column for the computer-based edition of the test. Some test supports can be provided outside the test platform.	External or Non-Embedded Support Use information in this column for paper-based of the test or if the test support must be provided of the test platform.	
Adaptive or ACCESS, Specialized Furniture DLM, NGSA, RICAS		Any Student	Accessibility Feature	May be provided as a non-embedded support.	ADAPTIVE OR SPECIALIZED EQUIPMENT OR FUF Some students may require specialized equipme furniture including (but not limited to) special se weighted vests, fidget tools, noise-reducing hear specialized lighting or acoustics, or adaptive keyl desks, or lighting. I. Accessibility Features

Accessibility features are tools and supports that are available to *all* students, regardless of their disability or EL status.

- Accessibility features are not the same across tests. Please read the description of the accessibility feature carefully and review any additional test manuals, if applicable.
- Most accessibility features are embedded in the computer-based test platform and have paper-based equivalents for students taking the paper-based tests. Which version of accessibility feature is provided depends on student preference and in some cases staffing.
- Most accessibility features will be available on the day of the test to *any* student who wishes to use them; however, a some *must* be either designated in the test's online system or requested and approved before testing because they require additional preparation or a specific setting in the test platform.
 - NOTE: Both the NGSA and PSAT 10/SAT use different versions of the TIDE system for assigning accommodations. Accommodations and accessibility features will not transfer from the NGSA TIDE to the PSAT 10/SAT TIDE or vice versa. Test supports must be designated in each TIDE system separately.
- Principals have the flexibility to test any student, including non-disabled and non-EL students, using the accessibility features listed on the following pages as long as all requirements for testing conditions and staffing are met.
- It is advisable, although not required, to include accessibility features in the IEP, 504, or EL plan of any student who has one of these plans.

 Table 1: Accessibility Features (available to any student, regardless of disability or EL status)

Test Support Name	Test	Student Status	Support Group	Embedded Support Use information in this column for the computer-based edition of the test. 	RICAS	IEP/504	Accommodation	ASSISTIVE TECHNOLOGY. This is an accommodation for R	ICAS.	
	PSAT10_SAT	IEP/504	Accommodation	ASSISTIVE TECHNOLOGY. This is an accommodation for P	SAT 10 and SAT.	

Test Support Name	Test	Student Status	Support Group	Embedded Support Use information in this column for the computer-based edition of the test. Some test supports can be provided outside the test platform.	External or Non-Embedded Support Use information in this column for paper-based edition of the test or if the test support must be provided outside of the test platform.
Auditory Supports	ACCESS	Any Student	Accessibility Feature	AUDIO AIDS: A tool that the student can use to amplify or noise buffers, and white noise machines.	diminish sound. Audio aids include: amplification devices,
				Noise buffers must be compatible with the requirement	ts of the test (i.e., allow the student to hear listening items).
				Smart phones cannot be used. Music or other recording	s may not be played on headphones worn during testing.
				See the WIDA Accommodations and Accessibility Featur	es Manual, page 5 for more information.
				computer-based test: Noise canceling headphones or earbuds may be connected to the computer. Be aware that some headphones may not be compatible with hearing aids or cochlear implants. In these situations, the student may participate in online testing by playing the sound through the computer's external speakers. Students using speakers must be tested in a separate setting.	PAPER-BASED TEST: Noise canceling headphones, earplugs, earphones, or other noise buffers not connected to an audio device may be used during paper-based testing for Reading, Writing, and Speaking. For the Listening test, students may need to use the noise buffers connected directly to the device used to play the Listening and Speaking CD.
	NGSA, RICAS	Any Student	Accessibility Feature	May be provided as a non-embedded support.	AMPLIFICATION Volume control, amplification device, FM system, noise buffer, noise-cancelling earmuffs/headphones, white noise machine.
					NOTE: Smart phones cannot be used. Music or other recordings may not be played on headphones during testing. NGSA TIDE: Amplification RICAS PNP: Not Recorded
	DLM	Any Student	Accessibility Feature	AMPLIFICATION. The volume of the testing device may be increased using computer controls. DLM PNP Profile: Not Recorded	AUDITORY AMPLIFICATION/FM SYSTEM. Student uses an auditory amplification device or special sound system to hear the test administrator. DLM PNP Profile: Not Recorded
	PSAT10_SAT	IEP/504	Accommodation	AUDITORY SUPPORTS. This is an accommodation for PSAT	10 and SAT.

Test Support Name	Test	Student Status	Support Group	Embedded Support Use information in this column for the computer-based edition of the test. Some test supports can be provided outside the test platform.	External or Non-Embedded Support Use information in this column for paper-based edition of the test or if the test support must be provided outside of the test platform.
Assistance from a test administrator regarding the use of the computer-based testing platform.	ACCESS, DLM, RICAS, NGSA, SAT, PSAT 10	Any Student	Accessibility Feature	May be provided as a non-embedded support.	ASSISTANCE FROM A TEST ADMINISTRATOR REGARDING THE USE OF THE COMPUTER-BASED TESTING PLATFORM. The supports below must be provided to any student who requires them during the testing session, including students with disabilities and EL students:
					 This only refers to helping a student navigate these test platforms: RICAS: TestNav PSAT 10: Test Delivery System (TDS) NGSA: Test Delivery System (TDS) DLM: Kite Student Portal ACCESS: WIDA AMS Test administrators are not to help students answer a test question. This also does not remove the responsibility of schools to teach students how to navigate the online test systems prior to testing. Students should become familiar with the features and basic functionality of the computer-based testing platforms by viewing student tutorials and taking online practice tests prior to test administration.
Breaks	ACCESS	EL	Accessibility Feature	May be provided as a non-embedded support.	SUPERVISED BREAKS. Students may take breaks as needed. These breaks might be planned in advance based on student need based on a student's specific needs (e.g., fatigues easily, overly anxious). SHORT SEGMENTS. If the student requires breaks beyond the 30 minutes allotted for the test, then a paper version may be necessary. Each domain must be completed on the same day. See the WIDA Accommodations and Accessibility Features Manual, page 3 for more information.
	DLM	Any Student	Accessibility Feature	BREAKS. The DLM alternate assessments are highly indivious challenges. This includes scheduling testing, including bre	dualized for each student depending on their abilities and aks, to maximize student engagement and participation.
	NGSA	Any Student	Accessibility Feature	May be provided as a non-embedded support.	BREAKS. Student requires extra breaks, extended breaks, or breaks as needed. NGSA TIDE: Not Recorded

Test Support Name	Test	Student Status	Support Group	Embedded Support Use information in this column for the computer-based edition of the test. External or Non-Embedded Support Use information in this column for paper-based edition of the test or if the test support must be provided outside of the test platform.
Magnification Tool or Device	ACCESS	Any Student	Accessibility Feature	LOW VISION AIDS OR MAGNIFICATION DEVICES. A magnifier tool is built into the test platform. Students must scroll to see all the content when the test is magnified, and they must return to the default size to use other tools, such as the highlighter.	LOW VISION AIDS OR MAGNIFICATION DEVICES. Students may use a low-vision device with a regular or large-print test booklet. See the WIDA Accommodations and Accessibility Features Manual, page 7 for more information on magnification devices. See the LARGE-PRINT EDITION accommodation and page 14 in the WIDA Accommodations and Accessibility Features Manual for more information.
	DLM	IEP Only	Accommodation	MAGNIFICATION and LARGE PRINT EDITION. These are as	ccommodations for DLM.
	RICAS	Any Student	Accessibility Feature	MAGNIFIER TOOL. (Accessibility Feature) Magnifier tool enlarges part of the screen; Zoom tool enlarges or reduces entire screen by pressing Ctrl - or Ctrl +. RICAS PNP: Not Recorded	MAGNIFICATION DEVICE (Accommodation for a student with a documented disability who requires a magnification device). The student uses an external device such as a Smart Board, closed-circuit TV or hand-held magnification device to enlarge the computer display or paper test. Device cannot be connected to internet or be able to record images. RICAS PNP: Not Recorded See the LARGE-PRINT EDITION accommodation for students who will take the paper version of the test.
	NGSA	Any Student	Accessibility Feature	ZOOM or MAGNIFIER TOOL. Increase the font size displayed on the screen. Sizes are: 1x (default setting), 1.5x, 1.75x, 2.5x, 3x, 5x, 10x, 15x, 20x. NGSA TIDE: Magnification (select the magnification size) and Streamline Mode (settings from 5x to 20x).	MAGNIFICATION DEVICE: This is an accommodation for NGSA. See MAGNIFICATION options and LARGE PRINT EDITION for more information.
	PSAT10_SAT	Any Student	Accessibility Feature	zoom In/zoom out. Increases the font size displayed on the screen. Sizes are: • Level 1 - 24 point (default) • Level 2 - 31 point • Level 3 - 41 point • Level 4 - 51 point • Level 6 - 172 point • Level 7 - 229 point • Level 9 - 340 point CB TIDE: Levels 1-4 do not need to be set in TIDE. Instead, set through the Universal Tool in the online test system. Levels 5-9 need to be set in TIDE.	MAGNIFICATION DEVICE: This is an accommodation for PSAT 10 and SAT. See MAGNIFICATION options and LARGE PRINT EDITION for more information.

Test Support Name	Test	Student Status	Support Group	Embedded Support Use information in this column for the computer-based edition of the test. Some test supports can be provided outside the test platform.	External or Non-Embedded Support Use information in this column for paper-based edition of the test or if the test support must be provided outside of the test platform.
Mark for Review	NGSA, PSAT10_SAT	Any Student	Accessibility Feature	MARK FOR REVIEW. Students/scribes can mark items for review and return to them at a later time. The default will be ON for all students. NOTE: If an answer option is selected when the student marks an item for review, the answer will not be saved when the student moves on to the next segment or after a break of more than 20 minutes. NGSA & CB TIDE: Not Recorded	MARK FOR REVIEW. Students taking the paper test can mark items with a blank place card for review at a later time. NGSA & CB TIDE: Not Recorded
	RICAS	Any Student	Accessibility Feature	MARK FOR REVIEW. Student can mark test items for review and return at a later time. RICAS PNP: Not Recorded	MARK FOR REVIEW. Student can use a blank place marker with a paper edition of a test(s) to mark test items for review at a later time. RICAS PNP: Not Recorded
Mouse Pointer	RICAS	Any Student	Accessibility Feature	ALTERNATE CURSOR/MOUSE POINTER. The mouse pointer and/or the cursor can be magnified and the color can be changed for students with visual impairments. The degree of magnification and color of the mouse pointer and/or cursor must be selected in SR/PNP prior to testing. Options are: • M = Medium • L = Large • XL = Extra Large • XLB = Extra Large Black • XLG = Extra Large Green • XLY = Extra Large Yellow RICAS PNP Column R (Alternate Cursor/Mouse Pointer)	N/A
	NGSA	Any Student	Accessibility Feature	MOUSE POINTER. The mouse pointer can be magnified and the color can be changed for students with visual impairments or those who are using a color contrast option. The degree of magnification and color of the mouse pointer must be selected in TIDE prior to testing. Color options are: black, green, red, white, or yellow. NGSA TIDE: Mouse Pointer	N/A
	PSAT10_SAT	Any Student	Accommodation	MOUSE POINTER. This is an accommodation for PSAT 10 a	nd SAT.

Test Support Name	Test	Student Status	Support Group	Embedded Support Use information in this column for the computer-based edition of the test. Some test supports can be provided outside the test platform.	External or Non-Embedded Support Use information in this column for paper-based edition of the test or if the test support must be provided outside of the test platform.
Notepad or Scratch Paper	ACCESS	Any Student	Accessibility Feature	STICKY NOTES. A sticky notes tool is built into the testing tool for the writing test and can be used for notes, drafts, and diagrams. Sticky notes do not maintain content between screens. Sticky notes are available only on some screens. SCRATCH PAPER. May also be provided as a non-embedded support. See the WIDA Accommodations and Accessibility Features Manual, page 7, for more information.	SCRATCH PAPER. Scratch paper should be available to students upon request for all other language domains and grade levels. Only student work in the test booklet will be scored. Allowable types of scratch paper: Scratch paper can be any blank writing surface, including plain or colored paper, grid, wide-ruled, braille paper, raised-line paper, bold-line paper, raised-line grid paper, or colored paper. Students may alternately use an individual, erasable whiteboard as scratch paper for notes and responses. No graphic organizers may be provided.

III. Participation Requirements for State Assessments

All students, including students with disabilities and English learners (ELs), are expected to participate in all state assessments for their current grade¹. Students with significant cognitive disabilities who meet all three eligibility criteria will take the Dynamic Learning Maps (DLM) alternate assessments in English language arts, mathematics, and science (if applicable). In addition, ELs with significant cognitive disabilities who are unable to participate in the ACCESS for ELLs, even with accommodations, must take the Alternate ACCESS for ELLs. The information in this manual is intended to guide decision-making by Individualized Education Program (IEP) teams and 504 plan coordinators as to *how*, not *whether*, students with disabilities will participate in the Rhode Island State Assessment Program. Appendix A of this manual contains a table of required tests by grade level.

Participation Requirements for Students with Disabilities

Please note the following about student participation in state assessments:

- State and federal education laws assume that all students with disabilities educated with Rhode Island
 public funds are expected to participate in annual statewide assessments, including students enrolled in
 public schools, charter schools, educational collaboratives, and outplacement schools both within and
 outside of Rhode Island, as well as students incarcerated at the RI Training School.
- Students with disabilities are expected to participate in the grade-level¹ tests that correspond with the grade reported to RIDE's Enrollment Census. If you have questions about the grade level for a student in one of the online test platforms, contact your district test coordinator or special education director.
- Assessment and accommodations decisions for students with disabilities should be revisited each year.
 All accommodations must be listed in the IEP or 504 Plan.
- Although including accommodations decisions at test supports in EL plans is not required, we encourage this practice in order to ensure that students receive the test supports they need.
- The principal is responsible for ensuring that each student is assessed using the test format and accommodations listed in the student's IEP, 504 plan, or EL plan.

Participation Requirements for Students Who Are English Learners (ELs)

EL students must participate in all statewide tests scheduled for their grades, regardless of the language program and services they are receiving or the amount of time they have been in the United States.

The one exception applies to first-year EL students who enrolled in U.S. schools **after April 1, 2021** for whom ELA testing is *not required*. **First-year EL students** *must* **participate in mathematics and science tests, as applicable**. Results will be reported for diagnostic purposes only; students' results will not be included in school and district accountability reporting.

¹ *Current Grade Level* is the grade level recorded in the Enrollment Census by the LEA. RIDE will register the student for all required tests at the grade level recorded in the Enrollment Census. Testing the student at any grade level other than what is in the Enrollment Census may result in test scores being invalidated. Additionally,

If a student skips a grade level, the student does not make up tests for the skipped grade level.

o If a student retained in the same grade level, the student takes the tests for their current grade level again, even if the student took the test the previous year.

EL Participation Requirements for State Assessments

	ELA Test (PSAT10, SAT, RICAS, or DLM)	Mathematics Test (PSAT10, SAT, RICAS, or DLM)	Science Test (NGSA or DLM)
First-Year EL Students Not Required		Required	Required
All Other Students Required		Required	Required

For questions and information regarding the **identification screening**, **placement**, **and reclassification of EL students**, contact Flavia Molea-Baker, RIDE Office of Student, Community, and Academic Supports (OSCAS) at 401-222-8985 or flavia.moleabaker@ride.ri.gov or at: www.ride.ri.gov/ELs.

Participation Requirements for English Learners (ELs) with Disabilities

EL students with disabilities are entitled to receive test accommodations and to participate in the Rhode Island alternate assessments, the Dynamic Learning Maps, as determined by their IEP team.

If a Student Refuses an Accommodation

If a student refuses to use an accommodation listed in their plan, follow these guidelines:

- The accommodation must remain available to the student during testing.
- The school must document in writing that the student refused the accommodation and keep the documentation on file at the school. A sample form can be found in Appendix C: Student Accommodation Refusal Form. This form can also be downloaded from www.rid.ri.gov/accommodations.
- Students may not be asked to sign an agreement waiving their right to receive an accommodation.

Unique Accommodations Requests

If a student with a disability or an English learner requires an accommodation not listed in this manual, the school may request approval for use of the unique accommodation, provided the accommodation does **not**:

- fundamentally change the test or the construct being measured by the test.
- violate test security requirements.

Requesting Unique Accommodation Approval: Complete the Unique Accommodation in Appendix D or download from www.ride.ri.gov/accommodations and fax to 401-222-3605 at least two weeks prior to testing. If approved, amend the accommodation section in the IEP or 504 plan.

Participation Criteria for Alternate Assessments

Guidance on how to make eligibility decisions for the alternate assessments (DLM) can be found in *Guidance for IEP Teams* and is posted at www.ride.ri.gov/dlm. Be sure that all IEP team members read and review this document before making any final determination on whether or not a student should participate the DLM Alternate Assessments.

IV. Accommodations for Students with Disabilities

The District's Role in Monitoring the Selection of Accommodations

The information in this section is intended to guide decision-making regarding the selection, use, and evaluation of accommodations for testing. **IEP teams and 504 plan coordinators should identify and select only those accommodations for each assessment that are needed by the student.**

The test coordinator and the principal are responsible for ensuring that each student is provided with the test accommodations listed in his or her IEP or 504 plan. The student's plan must be revised as needed, either during routinely-scheduled meetings prior to testing or through the amendment process to ensure that only accommodations the student finds helpful and will use are included. It is also advisable (though not required) to list any accessibility features in the plans to ensure these will be also be provided.

Reliance on test accommodations should never replace appropriate and rigorous instruction based on grade-level standards in the subject being tested.

Accommodations for Students with Disabilities

Purpose of Test Accommodations

A test accommodation is a change in the way a test is given or the way in which a student responds to test questions. Test accommodations are intended to:

- offset the effects of the student's disability and remove barriers to participating in the assessment;
- provide the necessary conditions for a student to demonstrate knowledge and skills effectively on the assessments;
- provide the opportunity to report the test results of students who require accommodations;
- provide comparable test results to those of students who did not receive accommodations; and
- provide results that do not affect the validity or reliability of the test scores.

Accommodations may not:

- alter, explain, simplify, paraphrase, or eliminate any test question, reading passage, writing prompt, or multiple-choice answer option;
- provide verbal or nonverbal clues or suggestions that hint at *any* answer option;
- contradict test administration requirements or result in a violation of test security; e.g.,
 - modify, reorder, or reformat test questions in any way (see translation accommodations for information on when, and for which tests, translations are acceptable);
 - require paper-based tests be photocopied, photographed, scanned, altered, or duplicated in any way;
 - require screen shots of computer-based tests be taken;
 - require the use of English-language dictionaries for their administration.

Eligibility for Accommodations

ELIGIBLE: students with disabilities served by an IEP or 504 plan

The right for a student with a disability to receive accommodations on state assessments is protected by federal and state laws. Their plan **must** specify which accommodation(s) the student will receive.

NOT ELIGIBLE: students without documented disabilities and students who are not served by an IEP or 504 plan

A student who does not have a documented disability or who is not served by either an IEP or 504 plan is not eligible to receive accommodations on state assessments, regardless of whether the student currently receives instructional supports or accommodations on other types of assessments. Students who have intervention plans (RtI plans) or Personal Literacy Plans are not eligible to receive accommodations on state assessments; however, all students may use accessibility features.

If an Incorrect Accommodation Was Provided During Testing

In the event a student was provided the wrong accommodation or an accommodation that was not listed in their plan, the school should immediately contact the appropriate RIDE for guidance on how to proceed.

• **For RICAS:** If a student takes a test section twice due to a school decision to have the student retest with the correct accommodation, all or part of the student's score may be invalidated for accountability purposes. Families will still receive score reports.

Updating IEPs and 504 Plans

IEPs and 504 plans should be updated for all students with disabilities for statewide test administrations to reflect the updated policies and accommodations available. Including the appropriate designated accessibility features in the plans of students is also encouraged, but not required.

Amending IEPs or 504 Plans

If a student requires an accommodation that is not in their IEP or 504 Plan and there is not enough time before testing to convene a full IEP or 504 Plan team meeting, an amendment process can be followed to ensure that the accommodations section of the IEP or 504 Plan is updated prior to testing. The following is from *The IEP Process: Frequently Asked Questions* (p. 72, https://www.ride.ri.gov/Portals/0/Uploads/Documents/OSCAS/IEP-FAQ 2010-08-19 15.pdf).

These changes may be made at an IEP Team meeting with the entire IEP Team present. However, if the parent(s) of the child with a disability and the school district agree, the changes can be made without holding a meeting. In this case a written document would be developed amending the child's current IEP. Individuals are encouraged to refer to his/her district procedures and forms for amending the IEP with or without a meeting. If changes are made to the IEP without a meeting, the district must ensure that the child's IEP Team is informed of the changes.

Similarly, 504 plans must reflect only those accommodations required by the student. Consent by the parent/guardian is *not* required for a new or modified 504 plan, although the parent/guardian must be notified.

Process for Selecting and Evaluating Accommodations for a Students with a Disability

Accommodations are intended to offset the effects of a disability in order to allow a student to participate effectively in testing. When selecting accommodations, educators should consider the following:

• Determine the learning challenges the student is experiencing and the effect the student's disability has on their learning and their ability to access the test independently. Consider the student's classroom performance, not just the nature or type of disability. In other words, accommodations must mitigate the effect(s) of the disability and increase the student's ability to take the test. For example, providing a read aloud for a student with dyslexia may increase the student's ability to take the test. A

student with fine motor problems may benefit from a speech-to-text program or a scribe.

- Brainstorm the use of various accommodations, accessibility features, and test administration considerations with IEP team members and other adults familiar with the student.
 - o What supports were used successfully with students who have similar learning profiles?
- Try out the accommodation(s) in different assessment settings and adjust as needed.
- Evaluate whether the accommodation addresses the student's need. If not, revise the plan to provide accommodation(s) and supports accordingly.

NOTE: Do not include accommodations "just in case" or "just because" it seems like a good idea or the teacher/IEP team is covering their bases. Accommodations should be thought out and deliberately selected to increase a student's independence and access to the test, not to mimic instructional strategies used in the classroom. For example: if calculators are used during instruction, that doesn't mean the student should have a calculator during the non-calculator section of the test if their disability doesn't affect their ability to perform calculations.

- If the accommodation addresses the challenge, determine whether the accommodation is allowed on the specific test(s);
 - o develop or amend the IEP or 504 plan accordingly to include the accommodation(s) and the test(s) on which they will be used.

Accommodations for Students with Disabilities

Please note the following:

- See Navigating the Table of Test Supports for information on how to read Table 5.
- The following pages list the accommodations available to students with disabilities either through the test platform (embedded) or by a test administrator (external).
- **Special Access** accommodations are for the small number of students who meet the criteria outlined in the charts on the following pages.
- Accommodations that must be entered in the online test platform before testing have the name of the
 accommodation in the online test platform, and any other instructions, listed below.
- The accommodations are listed in alphabetical order.

RICAS Special Access Accommodations for Students with Disabilities

Special access accommodations are intended for use by a *very small number of students* who would not otherwise be able to access the test because of a disability that severely limits or prevents them from performing the skill in question. Teams must exercise caution when considering whether a student requires a special access accommodation, since these accommodations may alter part of what the test is designed to measure. Teams must carefully review the criteria described for each special access accommodation listed in Table 5 that follows. Test results for a student who took the test using special access accommodation(s) must be interpreted with caution by parents and schools.

NOTE: RIDE will review each district's rate of use of special access accommodations. To ensure that IEP teams and 504 plan coordinators carefully review and apply appropriate criteria for use of special access accommodations, districts must do the following:

- train members of IEP teams and 504 plan coordinators on the use of accommodations, including "special access" accommodations;
- review all guidelines with staff for special access accommodations listed in Table 5; and
- Revise the IEPs and 504 plans of students with disabilities as needed.

Although test accommodations should generally be consistent with accommodations used for instruction, the use of a "special access" accommodations during instruction *does not* automatically qualify a student to receive the same accommodation on a test unless the student meets the criteria for that accommodation.

IEP and 504 teams are encouraged to make consistent, defensible, and appropriate decisions for each student based on locally administered diagnostic assessments and to amend the IEPs and 504 plans of students who do not meet the criteria for the accommodation being considered.

Accessibility Features and Accommodations for EL Students

In addition to the accessibility features listed elsewhere in this manual, several accommodations are also available to ELs. Table 4 describes the relative suitability of each accommodation for students at beginning, intermediate, and advanced levels of English proficiency.

Table 4. Suitability of EL Accommodations based on English language proficiency of the student.

- Highly recommended for use by English learners at this ELP level
- Recommended for use by English learners at this ELP level
- O May not be appropriate for students at this ELP level

Accommodation	Most Likely to Benefit English Learners at the Following English Proficiency Levels				
	Beginning (ELP levels 1-2)	Intermediate (ELP levels 3-4)	Advanced (ELP levels 5-6)		
Approved bilingual word-to-word dictionary and glossary (English/Native Language)	0	•	•		
Text-to-speech or Human read-aloud for the Mathematics tests in English	•	•	0		
Human scribe or speech-to-text for Mathematics	•	•	0		
Read aloud/repeat/clarify general administration directions in English (by test administrator)	•	•	0		
Read aloud/repeat/clarify general administration directions in student's native language (by test administrator)	•	•	0		

Selecting Accessibility Features and Accommodations for EL Students

Decisions about universal and designated features and accommodations for EL students should be made by an informal group of educators familiar with the student; the group will identify the appropriate features and accommodations for each EL student. The decisions of the informal decision-making team should be documented using either the sample form *Documentation of Accommodations for an EL Student* provided in Appendix B, or using a similar, locally designed form.

Individuals involved in the decision-making process may include any of the following:

- the student,
- the English to Speakers of Other Languages (ESOL) or Bilingual/Dual Language (BDL) educator,
- school administrator (principal/assistant principal),
- general educator (content area teacher).

- special educator (if appropriate)
- parent or guardian

Decision-making teams are encouraged to determine and assign features and accommodations to EL students as early as possible in the school year to ensure that the student is familiar with their use. The student should not be introduced to an accessibility feature or accommodation on the day of the assessment. Appropriate features and accommodations are intended to allow EL students to demonstrate their knowledge and skills more effectively.

Guidelines for Selecting Accessibility Features and Accommodations for EL Students

Because a student's level of English language proficiency is transitional, and the student's linguistic needs will differ from one year to the next, accessibility features and accommodations should be examined and revised annually as the student progresses toward proficiency in English.

Decision-Making Procedures

The following procedures can be used to make appropriate decisions regarding selection of accessibility features and accommodations for EL students:

- 1. While examining the range of supports allowed on tests that may help the EL student access the curriculum and take assessments more effectively, the student's classroom teacher should consider:
 - Has a particular feature and/or accommodation been used successfully in the past to assist students in similar situations and at similar English proficiency levels?
- 2. While trying out the selected supports during routine instruction to determine whether they meet the student's needs, the teacher should consider the following questions:
 - Does the feature and/or accommodation help the student overcome the barrier posed by his or her developing English language proficiency?
 - Is the student comfortable using the feature or accommodation?
- 3. The teacher should observe the student in the classroom (or if possible, across different classrooms and school settings) using the accessibility feature or accommodation and inform members of the decision-making team which features or accommodations seem most appropriate and effective.

Based on the accessibility feature(s) and/or accommodation(s) listed in this manual and used successfully in the classroom, the teacher can select the appropriate test supports for the student to use on the tests.

4. The teacher should document the final decisions either on the sample form provided in Appendix B, or use a similar locally designed form, and keep this form in the student's file.

Involving EL Students in Selecting and Using Accommodations

The more that an EL student is involved in the accommodation selection process, the more likely the accommodations will be accepted and used by the student. Also, as students' English proficiency increases, and especially as students reach adolescence and the desire to be more independent increases, students will help to determine when the support is no longer useful. Students are likely to increase their self-advocacy abilities over time to ensure that the selected supports are provided during testing. Teachers and other adults can play a role in assisting students to advocate on their own behalf regarding their need for and use of accessibility features and accommodations.

It is important to introduce the use of selected accessibility features and accommodations as early as possible in the school year before the tests are administered in order to familiarize students with their use and determine their effectiveness. **Do not provide accommodations for the first time during an assessment.**

Evaluating the Effectiveness of Features and Accommodations

Accessibility features and accommodations should be evaluated over time for their effectiveness. Observations conducted during test administration, interviews with test administrators, and talking with students after testing is likely to yield data that can be useful in guiding the evaluation of the use of features and accommodations at the school, district, and student levels.

The following questions can guide decision-making regarding the effectiveness of the selected accessibility features and accommodations.

- Was the student familiar with the feature or accommodation prior to testing?
- Does the student use the feature or accommodation routinely?
- Was the student comfortable using the feature or accommodation?
- Does the student's performance on the assessment improve when the feature or accommodation is used?

Table 5: Accommodations for Students with Disabilities and English Learners

Test Support Name	Test	Student Status	Support Group	Embedded Support: Available accommodations embedded in the online testing platform (TestNav, TIDE, WIDA AMS, and Kite Student Portal) for the computer-based editions of tests. Spanish Edition	PSAT10_SAT	EL ONLY	Accommodation	SPANISH EDITION. Spanish editions of the PSAT 10 and	SAT School Day tests are not available.
	NGSA	EL	Accommodation for EL Students	SPANISH EDITION OF SCIENCE TEST. Spanish and English translations for test items are available through a toggle screen for EL students. Students will be able to go back-and-forth between English and Spanish to answer test items in either, or both, languages. If a student also requires a read-aloud, the TTS feature will work in both English and Spanish, depending on which screen the student is displaying. NGSA TIDE: Spanish Edition	PAPER-BASED EDITION OF SPANISH (SCIENCE). Preprinted Spanish science tests are not available. If an EL student requires a printed science test, items must be printed individually using the Print-on-Demand feature. All responses must be transcribed (see below) in order to be scored. NGSA TIDE: Spanish Edition and Print-on-Demand TRANSCRIPTION. Students using the paper-based edition in English or the Print-on-Demand version of the Spanish test must have the test administrator transcribe the student's responses into the Test Delivery System (TDS) before the end of that testing session. Instructions are included in the Test Administrator Manual.
Spanish Edition	RICAS	EL Only	Accommodation	spanish edition of Ricas Math. Computer-based edition in Spanish of the math tests may be administered to any EL student who meets one of these criteria: • has a low level of English proficiency, • is currently receiving or has received mathematics instruction in Spanish, or • has little or no familiarity with technology. NOTE: The Spanish version of the math test does not have English versions of the test items. RICAS PNP Column AR (Spanish Edition)	SPANISH EDITION OF RICAS MATH. Paper-based options for EL students are on page 45.

Test Support Name	Test	Student Status	Support Group	Embedded Support: Available accommodations embedded in the online testing platform (TestNav, TIDE, WIDA AMS, and Kite Student Portal) for the computer-based editions of tests.	External or Non-Embedded Support: Available accommodations for the paper-based edition of the test or if test support will be provided outside of the test platform.
Speech-to-text, Scribe, Dictates, or Records Responses	ACCESS	IEP/504 Only	Accommodation	Updated for 2022. AAC DEVICES. AAC is considered the voice of a student who is unable to produce functional speech. Use of an AAC during testing should be consistent with the student's day-to-day instruction and communication methods and is not considered an accommodation. See the WIDA Accommodations and Accessibility Features Manual, page 21 for instructions on how to administer the ACCESS tests to students using AAC devices.	scribe. The test administrator marks or writes student responses into the student response booklet as the student dictates responses either verbally, using an external speech-to-text device, an augmentative communication device (e.g., picture/word board), or by gesturing, pointing, or eye gazing. All responses must be transcribed at the time of testing. Available for: Listening, Reading, Writing WORD PROCESSOR OR SIMILAR KEYBOARDING DEVIDE USED TO RESPOND TO TEST ITEMS. Student responds using standalone/external word processing or similar keyboarding device that is not compatible with the online test platform. Available for Listening, Reading, Writing See page 17 in the WIDA Accommodations and Accessibility Features Manual for more information on planning for and administering tests using this accommodation and Appendix B for transcription guidance. STUDENT RESPONDS USING RECORDING DEVICE. Student has a documented disability that affects their ability to write or process language. The student responds by using a recording device to respond, which is played back and transcribed by the student. Available only for Writing. See the WIDA Accommodations and Accessibility Features Manual, page 16 for information on planning and administering tests using this accommodation.
Speech-to-text, Scribe, Dictates, or Records Responses	DLM	IEP/504 Only	Accommodation	May be provided as a non-embedded support.	TEST ADMINISTRATOR ENTERING STUDENT RESPONSES. If a student is unable to input their own responses, they may indicate their responses through their typical response/communication mode (e.g., eye gaze, gesture). Test administrators may key in those responses only when the student is unable to record their responses. DLM PNP Profile: Test Administrator Entering Student Responses

Test Support Name	Test	Student Status	Support Group	Embedded Support: Available accommodations embedded in the online testing platform (TestNav, TIDE, WIDA AMS, and Kite Student Portal) for the computer-based editions of tests. ^{*}Beginning in April 2022, the essay portion of the SAT will not be included as part of the state assessment program.

APPENDIX B: Documentation of Accommodations for an EL Student

Student Name:

Sample Form (Optional)

Use this form to document the selection of accessibility features and accommodations for each EL student. Available accessibility features and accommodations are listed in the RISAP Accommodations and Accessibility Manual (2021-22). This form should be completed within 60 days of the start of school year or student's date of enrollment, and must be **updated annually**. Accommodations decisions for EL students with disabilities must also be documented in the student's IEP or 504 plan.

School Year:

Grade:	SASID:		
School:	pol:District:		
		commodations and features for the student:	
Teacher(s)			
Others (includir	ng student and/or parent)	-	
If the parent an		sion-making process, then they should be notified of the on the tests.

	ility Feature or Accommodation d by the EL Student for Testing	Notes/Comments	

(Continue on additional pages as needed.)

APPENDIX C: Student Accommodation Refusal Form

Sample Form (Optional)

If a student refuses an accommodation listed in his or her IEP or 504 plan, the school should document in writing that the student refused the accommodation, and the accommodation must be offered and remain available to the student during testing.

This form can be completed and placed in the student's file, and a copy sent to the parents. IEP teams, 504 plan coordinators, and educators making accommodations decisions for ELs should consider this information when making future accommodations decisions for the student. Use of this form is encouraged, but not required.

Reason for refusal:				
Comments:				

Keep this form on file at the school. Do not submit this form with your school's test materials.

APPENDIX D: Unique Accommodation Form

Downloadable Form: Find an interactive copy of this form at www.ride.ri.gov/accommodation

Directions: To request approval for a unique accommodation, this form must be submitted to **RIDE by fax to 401-222-3605** by the principal or designee or District Testing Coordinator or designee, at least six weeks prior to testing to ensure a timely response from RIDE. **DO NOT EMAIL.**

DISTRICT/SCHOOL ASSURANCES: In submitting this form for approval, the principal/designee or assessment coordinator assures that:

- This accommodation will be documented in the student's IEP, 504 Plan, or EL plan. In the case of an IEP, the parent/guardian of the student must sign the amended IEP prior to testing.
- The school team has met and considered all listed accommodations before proposing this unique accommodation.

The proposed accommodation is used, as appropriate, for routine classroom instruction and assessment.

District Name:	DATE:

NOTES:				

APPENDIX E: Emergency Accommodation Form

Downloadable Form: Find an interactive copy of this form at www.ride.ri.gov/accommodation

Use this form in cases where a student needs a new accommodation immediately prior to the assessment due to unforeseen circumstances. This may include a student who has recently fractured a limb (e.g., fingers, hand, arm, wrist, or shoulder); whose only pair of eyeglasses broke; or they are returning from a serious or prolonged illness or injury.

Directions: If the principal (or designee) determines the student requires an emergency accommodation, complete this form and submit to the district testing director so it can be retained in the student's file. Notify the parent that an emergency accommodation will be used during testing. Do not submit this form to RIDE.

Principal's Signature	Pate

^{*} Submit emergency accommodations requests for PSAT 10 and SAT through SSD Online.

APPENDIX F: SAT and PSAT 10 Questionnaire for Extended Time, Reader, Scribe, and Breaks

Downloadable Form: Find an interactive copy of this form at www.ride.ri.gov/accommodation

APPENDIX G: Providing the Sign Language Accommodation

Although it is understood that the nature of this accommodation requires individualized delivery in the communication method familiar to the student, individuals providing the sign language accommodation for the ACCESS, PSAT 10, SAT, NGSA, RICAS, and DLM assessments must follow these procedures during testing to ensure standardization of delivery.

Procedures for Providing the Sign Language Accommodation

- Signers must be trained on test administration policies as indicated in this document and as provided during online or in-person training opportunities provided by the district or school.
- Individuals providing the sign language accommodation must sign the security agreement.
- Signers should use signs that are conceptually accurate, with or without simultaneous voicing, translating
 only the content that is presented, without changing, emphasizing, or adding information. Signers may not
 clarify (except for test directions), provide additional information, assist, or influence the student's selection
 of a response in any way. Signers must do their best to use the same signs if the student requests a portion
 repeated.
- Signers must sign (or sign and speak when using Sim-Com [Simultaneous Communication]) in a clear and consistent manner throughout the test administration, using correct pronunciation, and without inflections that may provide clues to, or mislead, a student.
- Signers should emphasize only the words printed in boldface, italics, or capital letters and inform the student that the words are printed that way. No other emphasis or inflection is permitted.
- Signers may repeat passages, test items, and answer options as requested, according to the needs of the student. Signers should not rush through the test and should ask the student if they are ready to move to the next item.
- Signers may not attempt to solve problems or determine the correct answer to a test item while signing, as this may result in pauses or changes in inflection that may mislead the student.
- Signers must use facial expressions consistent with sign language delivery and must not use expressions that may be interpreted by the student as approval or disapproval of the student's answers.
- Test Administrators must be familiar with the student's IEP and should know in advance which accommodations are required by the student. Test Administrators must be aware of whether a student requires additional tools, devices, or adaptive equipment that has been approved for use during the test, such as a magnifier, closed circuit television (CCTV), abacus, brailler, slate, stylus, etc., and if use of these tools impacts the translation of the test, the signer should be aware of this.
- Upon review of the test, if a human signer is unsure how to sign and/or pronounce an unfamiliar word, the
 signer should collaborate with a content expert who is fluent in sign language (if available) to determine
 which sign is most appropriate to use. If the signer is unable to obtain this information before the test, the
 signer should advise the student of the uncertainty and spell the word.
- When using a sign that can represent more than one concept or English word, the signer must adequately
 contextualize the word in order to reduce ambiguity. The signer may also spell the word after signing it if
 there is any doubt about which word is intended.
- Signers must spell any words requested by the student during the test administration.
- **NGSA and RICAS Math Only:** When test items refer to a particular part of the text, the signer must re-sign the lines before signing the question and answer options. For example, the signer should sign, "Question X refers to the following part [paragraph]...," then sign that part to the student, followed by question X and the answer options.

- RICAS ELA Only: When test items refer to a particular part of a passage, the signer cannot sign any part of the passage. The signer can sign line or stanza numbers for passages before signing the question and answer options. For example, the signer should sign, "Question X refers to the following lines [paragraph]...," then sign the line or passage numbers, followed by question X and the answer options.
- When signing selected-response items, signers must be careful to give equal emphasis to each answer option and to sign all answer options before waiting for the student's response.
- When answer options will be scribed, the signer should inform the student at the beginning of the test that if the student designates a response choice by letter only ("B," for example), the signer will ask the student if they would like the response to be signed again before the answer is recorded.
- If the student chooses an answer before the signer has signed all the answer options, the human signer must ask if the student wants the other answer options to be signed.
- After the signer finishes signing a test item and all answer options, the signer must allow the student to
 pause before responding. If the pause has been lengthy, the signer should ask: "Do you want me to sign the
 question or any part of it again?" When signing questions again, signers must avoid emphasizing words not
 bolded, italicized, or capitalized.

Sign-System-Specific Procedures

Signers must deliver the accommodation in the language or communication mode used by the student according to the student's IEP.

American Sign Language (ASL)

Signers delivering the accommodation via ASL must use appropriate ASL features (including signs, sentence structure, non-manual markers, classifiers, etc.) while protecting the construct being measured by the assessment. The signer must be careful not to cue the student.

English-Based Sign Systems (PSE, Sim-Com, etc.)

Signers delivering the accommodation via an English-based signing system (PSE, Sim-Com, etc.) must use the features of the communication mode used by the student. Signers delivering the test in English-based signing systems should use the rules of those signing systems (conceptually accurate signs, English word order, etc.), with or without simultaneous voicing.

APPENDIX H: RICAS Calculator Policy

The calculator types available to students on the RICAS mathematics tests for the computer- and paper-based tests are shown in the table below. Please keep the following in mind:

- Any 7th or 8th grade student may use one of the handheld calculators listed instead of the calculator embedded in TestNav. No accommodation is necessary if used on the calculator section of the test.
- At a minimum, 7th and 8th grade students should have access to a 5-function calculator.
- Non-calculator sessions of any RICAS math test: unless a student meets the criteria for receiving a calculator or other calculation tool during a non-calculator section of the test, no calculators are provided in TestNav and no handheld calculators should be made available.

Grade	Calculators Provided in TestNav	Allowable Handheld Calculators (computer- and paper-based tests)
3	None	None
4	None	None
5	None	None
6	None	None
7	5-function	5-function Scientific Graphing
8	Scientific	5-function Scientific Graphing

APPENDIX I: PSAT 10 and SAT Calculator Policy

Acceptable calculators for the mathematics tests:

- all scientific calculators
- all four-function calculators. Four-function calculators can be used by students but are not recommended due to the level of mathematics being assessed on the PSAT 10 and SAT.
- the following graphing calculators. If a graphing calculator is not listed below, as long as it meets the criteria under Unacceptable Calculators, it can be used during testing.

CASIO	HEWLETT-PACKARD	TEXAS INSTRUMENTS
FX-6000 series	HP-9G	TI-73
FX-6200 series	HP-28 series	TI-80
FX-6300 series	HP-38G	TI-81

FX-CG-10	Micronta	
	NumWorks	
	Smart ²	

Unacceptable Calculators

Students may not use:

- computers or tablets not used for testing, cell phones, smartphones, smartwatches, or wearable technology
- Calculators that can access the internet or that have wireless, Bluetooth, cellular, audio/visual recording and playing, camera, or any other smartphone-type features
- Calculators that have a QWERTY keypad, pen/stylus, or touchpad input. The calculator may be approved without the use of a stylus.

APPENDIX J: Scribe Guidelines

A scribe is an adult who writes down what a student dictates in a variety of ways (e.g., speech, American Sign Language (ASL), braille, assistive communication device). The guiding principle in scribing is to ensure that the student has access to and is able to respond to test content.

Qualifications for Scribes

- The scribe should be familiar with the student, such as the teacher or teaching assistant who is typically responsible for scribing during educational instruction and assessments.
- Scribes must meet the criteria outlined in the Rhode Island Test Coordinator Handbook.
- Scribes must have completed all training for administering the test, including security policies and procedures outlined in the selected test's test administrator manual.

Preparation for Scribes

- Scribes should read and sign a test security/confidentiality agreement prior to test administration.
- Scribes are expected to familiarize themselves with the test format in advance of the scribing session. Having a working familiarity with the test environment will help facilitate the scribe's ability to record the student's answers. Scribes may wish to review the practice test to become familiar with the assessment.
- Scribes should be familiar with the Individualized Education Program (IEP) or 504 plan if the student for whom they are scribing has a disability, so that there are plans in place for providing all needed designated supports and accommodations.
- Scribes should also have a strong working knowledge of the embedded and non-embedded universal tools, designated supports, and accommodations available on the test.
- Scribes should review the guidelines and procedures they will use during testing with the student at least one to two days prior to the test event.
- Scribes should practice the scribing process with the student at least once prior to testing.

General Scribe Guidelines

- This accommodation should be administered in a separate location, in a one-on-one setting.
- Scribes should answer all procedural questions asked by the student (e.g., test directions, navigation within the test environment).
- Scribes are expected to comply with student requests regarding use of all available features within the test environment.
- For computer-based administrations, scribes must enter student responses directly into the test interface exactly as the student dictates.
- Scribes may not respond to student questions about test items if their responses compromise validity of
 the test. The student must not be prompted, reminded, or otherwise assisted in formulating his or her
 response during or after the dictation to the scribe.
- Scribes may ask the student to restate words or parts as needed. Scribes may not suggest or hint or
 otherwise communicate to the student that they should make a change orcorrection to their answer.
- Scribes may not question or correct student choices, alert students to errors or mistakes, prompt or
 influence students in any way that might compromise the integrity of student responses. A scribe may
 not edit or alter student work in any way and must record exactly what the student has dictated.
- Students must be allowed to review and edit what the scribe has written. If necessary, the student can request the scribe to read aloud the completed text before final approval.
- For scribes working with students using ASL or other sign system, all ASL guidelines must be followed and the scribe must either be proficient in ASL or working with an ASL interpreter.

RICAS ELA Scribe Guidelines

A human scribe or speech-to-text are accommodations that allow students to provide their responses orally to a test administrator who will write or keyboard the responses directly onscreen (or into the student's test booklet). Students who receive this accommodation may respond to test questions either through:

- verbal dictation to a human scribe
- a speech-to-text device or other augmentative/assistive communication device (e.g., picture/word board)
- signing (e.g., American Sign Language, signed English, Cued Speech),
- gesturing or pointing
- eye-gazing

Clarification on the role of a scribe for the ELA test:

- The test must be administered individually in a separate setting.
- The scribe may enter student responses either onscreen (computer-based test) or in the student's answer booklet (paper-based test) at the time of testing. Test administrators who review the test will be asked to sign non-disclosure agreements.
- The scribe must write exactly what the student dictates. The scribe may not edit or alter the student's dictation in any way. When scribing, the scribe may assume that each sentence begins with an uppercase letter and ends with a period. All other capitalization, punctuation, and paragraph breaks are the responsibility of the student.
- After the student has finished dictating his or her response(s), the scribe must ask the student to review
 the draft and make any necessary edits, including capitalization, punctuation, spelling, and paragraph
 breaks
- The student may make edits independently or may direct the scribe to make the edits.
- The scribe must not assist the student in making decisions during the editing process.

Guidelines for Transcribing Student Responses

Circumstances may occur during test administration that may require a test administrator to **transcribe** a student's responses into a combined test and answer booklet, answer booklet, or onscreen. Transcribing responses by a test administrator may occur at any time until the end of the test window under secure conditions supervised by the principal (or designee). These situations may include:

- answers recorded in the wrong section of, or in an incorrect, combined test & answer booklet, answer booklet, or computer-based test.
- a student took the test using a special test format requiring that answers be transcribed; e.g., Braille, large print. (Braille responses must be transcribed by persons fluent in Braille.)
- a student uses speech-to-text software, or augmentative communication, or an assistive technology device and prints responses for transcription by a test administrator.
- A student recorded answers on blank paper, instead of in the required combined test & answer booklet, answer booklet of computer-based test, as an accommodation.
- The combined test & answer booklet or document becomes unusable; e.g., torn, wrinkled, or contaminated.

In cases where a student's responses must be transcribed *after* test administration is completed, the following steps must be followed:

at least two persons must be present during any transcription of a student's responses. At least one

- of the individuals must be an authorized test administrator; the other a principal or designee.
- the student's response must be transcribed verbatim into the combined test & answer booklet (or separate answer booklet for legacy tests) or computer-based test.
- the student's original printed responses must either be securely shredded or returned with the school's nonscorable materials.

NGSA Scribe Guidelines

For scribes working with students using Braille:

- In addition to the scribe guidance on page 102, the scribe should be proficient in reading (visually or tactually) braille in UEB and Nemeth.
- The scribe should enter the responses in the paper test booklet or online exactly as the student has brailled.
- The scribe may ask for the student to read back brailled responses for clarification if the brailled response is difficult to read due to student corrections.
- Students may review the written or typed response on paper or on the computer screen by either using the scribe to read back the entered response or using assistive technology.
 Students may indicate any changes or revisions to the scribe.
- When the student has finished testing (the end of the test session), the scribe will immediately collect all scratch paper and rough drafts, and:
 - (if online) at the direction of the student, will submit the student's responses through the TDS.
 The scribe will then collect the login ticket, and deliver all collected materials to the Test
 Administrator and confirm the student's test has been submitted.
 - (if paper booklet) deliver the paper booklet and all other collected materials to the Test Administrator. The Test Administrator will then need to login to the Data Entry Interface (DEI) to transfer the student's responses from the paper booklet exactly as indicated by the student into the DEI before the end of the testing window when the Test Coordinator ships all completed booklets. See Appendix C of the RI NGSA Test Coordinator Manual for guidance on using the DEI.

For scribes working with students taking the online test in Spanish:

- In addition to the general scribe qualifications, preparation, and guidelines above, the scribe should be proficient in reading, writing, and speaking Spanish.
- Students will need the following settings in the TIDE/TDS before testing: Spanish version (embedded), scribe (non-embedded), 1:1 administration (non-embedded).
- The scribe should enter the responses in the Test Delivery System (through the student's login) exactly as the student indicates.
- When the student has finished testing (the end of the test session), at the direction of the student, the scribe will submit the student's responses in the TDS. The scribe will then immediately collect all scratch paper and the login ticket and deliver those to the Test Administrator (or Test Coordinator, if the scribe is administering the test to this student).

For scribes working with students taking the test in Spanish using "print-on-demand" (i.e., paper edition Spanish version) in regular font size or large print:

• In addition to the general scribe qualifications, preparation, and guidelines above, the scribe (test administrator) should be proficient in reading, writing, and speaking Spanish.

- Students will need the following settings in the TIDE/TDS before testing: Print-On-Demand (embedded), Spanish version (embedded), Text magnification (if large print), scribe (non-embedded), 1:1 administration (non-embedded).
- **Technology needed:** separate computer for the Test Administrator to approve the print requests for each item (see the *RI NGSA Test Administrator Manual,* page 71); printer to print the items for the student. These are secure items so the printer must be in the same room as the test is administered.
- Once the student has logged into the TDS and begun testing, the student (or scribe/Test Administrator) will have the ability print items from the test. There are two ways: selecting the "Print Item" option from the Context menu for that item, or selecting "Print Page" and "Print Stimuli" from the Global Menu (see the Guide to the Student Interface of the TDS). Once the print request has been generated, the Test Administrator will need to approve the request in TIDE and submit the item to the printer (see the RI NGSA Test Administrator Manual, page 71).
- Printed items, like paper test booklets, are considered secure materials. As such, keep track of all printed items both for security purposes and to reduce duplicate prints if a student wants to return to a particular item in that session for review (e.g., use paper clips to combine stimuli with their items, organize in order of the test for easier reference).
- The scribe should enter the student's responses into the TDS exactly as indicated by the student.
- When the student has finished testing (the end of the test session), at the direction of the student, the scribe will submit the student's responses in the TDS. The scribe will then immediately collect all printed items, scratch paper, and the login ticket and deliver those to the Test Administrator (or Test Coordinator, if the scribe is administering the test to the student). Printed items must be shredded immediately as they are secure materials and will not be shipped with the paper test booklets.

APPENDIX K: RICAS and NGSA Read Aloud (Human Reader) Guidelines

When a student cannot access text-to-speech and instead requires a human reader, or *test reader*, the following guidelines will help the test reader prepare to administer the test. Because the student depends on the test reader to read the test questions accurately, pronounce words correctly, and speak in a clear voice throughout the test, the person providing the read aloud must meet the qualifications and follow the guidelines below.

Qualifications for Test Readers:

- The test reader should be an adult who is familiar with the student, and who is typically responsible for providing this support during educational instruction and assessments.
- Test readers must meet qualifications for test administrators found in the RISAP Test Coordinator Manual.
- Test readers must be familiar with the terminology and symbols used on the NGSA test.
- For Spanish RICAS Math and NGSA Science Tests: Test readers must be fluent in reading, writing, and speaking Spanish.

Requirements:

- Test readers must read and sign a test security agreement prior to test administration.
- Test readers must familiarize themselves with the test and participate in any online and/or in-person training sessions held by the district, school, or provided online before the testing session.
- Test readers must be familiar with the read aloud and any other accommodations or test supports required by the student.
- It is important to practice with a student prior to testing so that both the student and the test reader are familiar with the process.

Guidelines for Administering Human Read Alouds:

- Read aloud of the RICAS ELA test: Make sure the student meets the criteria to receive this read aloud before administering the test. If you have questions, consult with your district special education director.
- Read alouds must be conducted in a separate setting, either individually or in a group of 2-5 students.
- Read each question exactly as written as clearly as possible.
- Adjust your reading speed and volume as requested by the student and maintain a neutral tone, facial
 expression, and posture.
- Avoid gesturing, head movements, and verbal or non-verbal emphasis on words not otherwise emphasized in text.
- Do not discuss the test questions with the student. This is a violation of test security; respond to the student's questions by repeating the item, words, or instructions verbatim as needed.
- Do not paraphrase, interpret, define, or translate any items or words. This is a violation of test security. EL students requiring translations of items or words may use a word-to-word dictionary or glossary.

Language Usage/Conventions

- Read all text as punctuated.
- Quotation marks should be verbalized as "quote" and "end quote" at the beginning and end of quoted material, respectively.
- For students with visual impairments. For words printed in boldface, italics, underlined, or capitals, tell the student the words are printed that way. Do not emphasize words not already emphasized in print. Emphasis is appropriate when italics, underlining, or bold is used in the prompt, question, or answers.

Diagrams/Pictures/Maps for Students who are Visually Impaired

Describe the diagram, picture, or map as concisely as possible following a logical progression. Focus on
providing necessary information and ignoring the superfluous. Use grade-appropriate language when
describing the image/graphic.

- Read the title or caption, if available.
- Any text that appears in the body of an image may be read to a student. Read text in images in the order
 most suited for the student's needs. Often the reader moves top to bottom, left to right, in a clockwise
 direction, or general to specific in accordance with teaching practices.

Graphs/Tables/Keys for Students who are Visually Impaired

- Read the title of the graph, table, or key first.
- Read the label and numbers on each axis second, referring to the horizontal axis at the bottom and vertical axis as the left side of the graph.
- For data tables, first read the title of the data table. If the data table has two or more columns, read as follows:
 - o The heading of the left column is...
 - o The heading of the right column is...
 - The data from left to right are as follows:
 - row one:
 - row two:
 - row three:
- Test readers must read scientific equations and symbols with technical accuracy and according to the charts on the following pages.

Description	Example(s)	Read As:
Large whole numbers	603,407,981	"six hundred and three million, four hundred and seven thousand, nine hundred eighty one"
numbers	45 000 600 443	"forty-five billion, six hundred eighty-nine thousand, one
	45,000,689,112	hundred twelve"
Decimal numbers	0.056	"zero point zero five six"
	4.37	"four point three seven"
Fractions	1 1 2	"one half, one fourth, two thirds, four fifths"
	$\frac{1}{2}, \frac{1}{4}, \frac{2}{3}$	Other common fractions include "sixths, eighths,
	14	tenths"
	25	"fourteen over twenty-five"
	487	"four hundred eighty-seven over six thousand, nine hundred
	6972	and seventy-two"
Mixed numbers	$3\frac{1}{2}$	read with "and" between whole number and fraction
	2	"three and one-half"
	$57\frac{3}{4}$	"fifty-seven and three fourths"
Percent	62%	"sixty-two percent"
	7.5%	"seven point five percent"
	0.23%	"zero point two three percent"
Money	\$4.98	"four dollars and ninety-eight cents" "thirty three cents"
	\$0.33	"five thousand, three hundred and sixty-eight dollars"
	\$5,368.00	NOTE: if contains a decimal point, read as "dollars AND cents"
Negative numbers	- 3	"negative three"
• do NOT read	5	"negative five eighths"
negative sign as "minus"	$-\frac{8}{8}$	
minus	-7.56	"negative seven point five six"
Dates (years)	1987	"nineteen eighty-seven"
	2005	"two thousand five"
Roman Numerals	I	"one"
	II	"two"
	III	"three"
	IV	"four"
Ratios	x: y	"x to y"
Addition	13 + 27 =	"thirteen plus twenty-seven equals"
Subtraction	487 - 159 =	"four eight seven minus one five nine equals"
Multiplication	63 x 49 =	"sixty-three times forty-nine equals"
	63 x 49 =?	"sixty-three times forty-nine equals question mark"

Division (vertical or horizontal)	$\frac{120}{15} = 8$	"one hundred twenty divided by fifteen equals eight"
Expressions or	N + 4	"'N' plus four"
Formulas containing	8x — 3	"eight 'x' minus three"
variables	4 (y — 2) + 5 =7	"four open parenthesis 'y' minus two close
NOTE: any letter		parenthesis plus five equals seven"
may be used as a variable.	$V=4\ \frac{r^3}{3}$	"Capitol 'V' equals four-thirds pi 'r' cubed"
	$x^2y^3 = -36$	"'x' squared 'y' cubed equals negative thirty-six" or
		"'x' to the second power times 'y' to the third power equals negative thirty-six"
	156x ≥ 4	"one hundred fifty-six 'x' is greater than or equal to four"
Coordinate Pairs	the point (-1, 2)	"the point (pause) negative one comma two"
Exponents	2 ²	"two squared"
	6 ⁻⁵	"six to the negative fifth power"
	3 ^{2.5}	"three to the two point five power"
	2 ^x	"2 to the x power"
Less Than	<	"is less than"
	≤	"is less than or equal to"
Greater Than	>	"is greater than"
	≥	"is greater than or equal to"
Similar To	~	"is similar to"
Plus or Positive	+	"plus" or "positive" depending on the context of the item.
Negative/Minus	-	"minus"
	-4°C	"negative four degrees Celsius"
	-20°F	"negative twenty degrees Fahrenheit"
	-22°K	"negative twenty-two degrees Kelvin"
Pi	П	"pi"
Theta	θ	"Theta"
Alpha	α	"Alpha"
Percent	%	"percent"
Formulas	$p = \frac{m}{V}$	Read letters and numbers of scientific formulas exactly as they are printed; do not substitute the words that the letters represent.
		"p is equal to m divided by capitol V"
Scientific Units		Abbreviated units should be described using the full word(s).
	3m	"three meters"
	9.8 m/s ²	"nine point eight meters per second squared"

Chemical Symbols		Elements and formulas should be read in a way that does not cue the correct answer or provide a hint to the student.
	Sodium sulfate (Na ₂ SO ₄)	If the item includes both the name and symbol of an element or formula of a compound, the symbol/formula may be read as the name in later instances within the test question: "sodium sulfate [pause] parentheses N-A two, S-O four
		parenthesis"
	Cl ²	If only the symbol/formula appears within the test question, only the symbol/formula should be read:
		"C-L two" not "Chlorine" or "Chlorine gas"

APPENDIX L: NGSA Simplified Test Directions Guidelines

Students with difficulties in auditory processing, short-term memory, attention, or decoding may benefit from having test directions simplified for them. This designated support may require testing in a separate setting to avoid distracting other test takers. This support is intended to ensure that students understand the directions for the test. Only the script in the TAM may be simplified. Test content, including test items, stimulus material or passages, individual words from items, or instructions for individual items may <u>NOT</u> be simplified or paraphrased.

Simplifying test directions should be consistent with classroom instruction and includes repeating or rephrasing.

Qualifications for Test Administrators Who Simplify Test Directions

Any test administrator who provides this test support on the NGSA should be:

- familiar with the student. Typically, the test administrator or teacher is responsible for providing this support during educational instruction and assessments.
- trained in administering the NGSA through online trainings and/or in-person training sessions held by the district or school in accordance with NGSA guidelines and policies.
- meet all criteria for being a test administrator as outlined in the NGSA Test Coordinator Handbook (www.ride.ri.gov/assessment-manuals)
- sign and abide by all requirements in the Test Security Agreement.

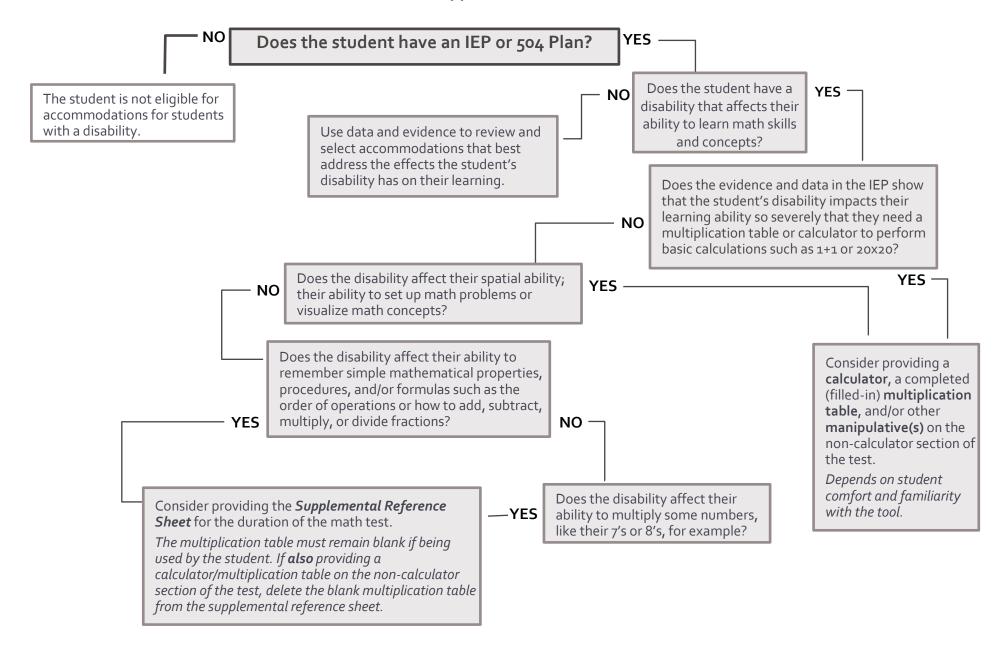

Procedures for Administering Simplified Test Directions:

- The test administrator must familiarize themselves with the testing environment and format before testing.
- The test administrator must be familiar with the student's needs, including any additional test supports, materials, or assistive technology the student may require.
- The test administrator may only simplify the script within the SAY boxes in the Test
 Administration Manual (TAM). Test items, stimulus material or passages, individual words
 from items, or instructions for individual items may NOT be simplified or paraphrased.
- The test administrator must be familiar with the vocabulary used in the directions.
- The test administrator must speak clearly and at a normal pace with clear pronunciation.
- The test administrator may break directions into parts or segments or using similar words or phrases.
- The test administrator may paraphrase, clarify, or simplify test directions.
- The test administrator may spell any words in the script if requested by the student.
- The test administrator may adjust their reading speed and volume as requested by the student.
- The test administrator may not prompt the student in any way that could affect their response to a test item.
- The test administrator may only read the test items aloud if the student is receiving that test support. If so, test administrators must also adhere to the NGSA *Guidelines for Read Aloud*.

NGSA: Examples of Simplified Test Directions

Full Log-in Directions	Simplified Log-in Directions
Now we are ready to log in. Once you have logged in, you will have to wait for me to approve the test before you start. I'll be checking that you have correctly entered the test session ID and other information.	Now we are ready to log in. Enter your legal first name, not your nickname, followed by your SASID or SSID number. Then enter the test session ID.
Enter your legal first name, not your nickname, followed by your SASID or SSID number. Then enter the test session ID. Raise your hand if you need help typing this information on your keyboard.	
Now click "Sign In." Once you have successfully logged in, you will see a screen with your first name and other information about you. If all of the information on your screen is correct, select YES to continue. If any of the information is incorrect, please raise your hand and show me what is incorrect.	Now click "Sign In." Make sure that your personal information on the next screen is correct and click YES to continue. If it is not correct, raise your hand.
On the next screen, select the [INSERT NAME OF TEST]. After you have selected your test, you will see a screen with a moving bar and message saying that you are waiting for Test Administrator approval. Please wait quietly while I verify each of your tests.	On the next screen, select the [INSERT NAME OF TEST]. Then wait.
After I approve you to begin testing, you will see a screen asking you to check your test content area and settings. If all the information is correct, you may select YES, START MY TEST. If any of it is incorrect, please raise your hand. Before your test appears, you will see a tutorial page listing the test tools and buttons that you may use during the test or that will appear on the test. Please read this carefully. You can also find this information during your test by clicking the HELP button in the top right corner.	After I approve you to begin testing, make sure that you have the right test and settings. If any of the test information is incorrect, please raise your hand. If the information is correct, click YES, START MY TEST.
When you are ready to begin your test, click BEGIN TEST NOW at the bottom of the page.	When you are ready to begin your test, click BEGIN TEST NOW at the bottom of the page.
