

Critical Evidence 2.1.1.a

SAT Suite Technical Manual Appendixes (October 2017)

SAT[®] Suite of Assessments Technical Manual Appendices

October 2017

Table of Contents

- 1 Appendix 1 Overview
- 10 Appendix 2 Fairness
- 11 Appendix 3 Test Development Procedures
- 36 Appendix 4 Testing Requirements
- 37 Appendix 5 Interpretation and Application of Results
- 66 Appendix 6 Psychometrics
- 321 Appendix 7 Validity

APPENDIX 1

Overview

Table A-1.1: Benefits Offered by Each Test Within the SAT Suite of Assessments

Assessment	Benefits
SAT	Learning, not memorizing. The SAT requires students to have a stronger command of fewer topics. Rote memorization and "cramming" to learn vocabulary that they soon forget isn't a part of the new SAT. Students are asked to apply deep understanding of the skills and concepts most important for college and career readiness.
	Connection to classroom learning and experience. Students will encounter an assessment that is closely connected to their classroom experience, one that rewards focused work and the development of valuable, durable knowledge, skills, and understandings. The questions and approaches will be more familiar to them because they are modeled on the best work of classroom teachers.
	Rights-only scoring. Scoring for the new test is based only on questions that students answer correctly. There is no point deduction for wrong answers, which will encourage students to give the best answer for every question rather than skip questions about which they are unsure.
	Free resources for practice and review. Students have access to free resources that introduce them to the SAT and give them a chance to enhance their preparation with targeted review and authentic practice. The College Board is partnering with Khan Academy® to provide free practice materials that are personalized, interactive, and engaging to help students prepare for the new SAT.
PSAT/NMSQT and PSAT 10	Prepare students for college and career. The PSAT/NMSQT and the PSAT 10 provide a mid-course measure of readiness during high school. Assessments in the SAT Suite of Assessments focus on the things that matter the most for college and career success and provide multiple opportunities for students to demonstrate their skills and make improvements.
	Link to online, personalized pathway for practice through Khan Academy. The College Board has partnered with Khan Academy to provide free, personalized online practice. Students can link their College Board and Khan Academy accounts so that their actual assessment results in the SAT Suite power targeted learning plans that students can use to learn more about and practice the skills that need improvement for college and career readiness.
	Identify students who have potential to succeed in AP courses. AP Potential is an online tool that identifies PSAT/NMSQT and PSAT 10 students who are likely to succeed in Advanced Placement courses, helping educators expand access to rigorous courses.
	Provide entry into scholarship programs. The PSAT/NMSQT is the qualifying test for entry to the National Merit® Scholarship Program, conducted by National Merit Scholarship Corporation (NMSC). Students who take the PSAT/NMSQT (typically in the fall of their junior year) and meet all other program entry requirements will be eligible to enter NMSC's competitions.

Table A-1.1 continued from previous page

Assessment	Benefits
	<p>Both the PSAT/NMSQT and the PSAT 10 offer opportunities in other scholarship and recognition programs, such as the National Hispanic Recognition Program. Beginning with the class of 2015, the following organizations have used data from the PSAT/NMSQT to enhance their recruitment efforts and reach a more representative group of eligible students from high schools across the country:</p> <ul style="list-style-type: none"> ▪ American Indian Graduate Center ▪ Asian & Pacific Islander American Scholarship Fund ▪ Hispanic Scholarship Fund ▪ Jack Kent Cooke Foundation ▪ United Negro College Fund (UNCF)
	<p>Collect and use valuable data. Extensive data and reporting resources help educators identify skill gaps and improve instruction from their students' PSAT/NMSQT and PSAT 10 results. The electronic Student Data File (available as an optional report for PSAT/NMSQT and PSAT 10) allows educators to manage student assessment data to inform instruction and educational decisions, such as student placement in courses and intervention groups.</p>
	<p>Identify skills for improvement. The score reports give students comprehensive, personalized feedback on their test performance, allowing them to see which questions they answered incorrectly and which academic skills they should work to improve.</p>
	<p>Build a college-going culture. Offering the SAT Suite of Assessments to all students helps create a college-going culture. The online college and career planning tools provided with the PSAT/NMSQT and the PSAT 10 spark college-going aspirations and introduce students to opportunities available after high school.</p>
	<p>Support college and career planning. The College Board offers personalized college and career planning tools that allow students to search online for colleges, explore majors and careers, and more.</p>
	<p>Sets a baseline for measuring student progress. Educators and students will be able to measure growth toward college and career readiness by establishing a performance baseline with scores on PSAT 8/9.</p>
	<p>Prepares students for the PSAT/NMSQT, the PSAT 10, and the SAT. Assessments in the SAT Suite of Assessments focus on the things that matter the most for college and career success and provide multiple opportunities for students to demonstrate their skills and make improvements.</p>
	<p>Collects and uses valuable data. Extensive data and reporting resources help educators identify skill gaps and improve instruction from the PSAT 8/9 results of their students. The electronic Student Data File allows educators to manage student assessment data to inform instruction and educational decisions, such as student placement in courses and intervention groups.</p>
PSAT 8/9	<p>Identifies skills for improvement. The score reports give students comprehensive, personalized feedback on their test performance, allowing them to see which questions they answered incorrectly and which academic skills they should work to improve.</p>
	<p>Builds a college-going culture. Offering the SAT Suite of Assessments to all students helps create a college-going culture, sparking college-going discussions and introducing all students to opportunities available after high school.</p>
	<p>Supports college and career planning. The College Board offers personalized college and career planning tools that allow students to search online for colleges, explore majors and careers, and more.</p>

Table A-1.2: Comparison of the Content Specifications for the Reading Test Across the SAT Suite of Assessments

	PSAT 8/9	PSAT/NMSQT, PSAT 10	SAT
Word Count (standard, six-character words)	4 "short" passages (500–625 words per passage) 1 "long" passage (626–750 words per passage)	3 "short" passages (500–625 words per passage) 2 "long" passages (626–750 words per passage)	2 "short" passages (500–625 words per passage) 3 "long" passages (626–750 words per passage)

APPENDIX 2

Fairness

There is currently no appendix content associated with Chapter 2. As the SAT Suite of Assessments continues to be administered, any appendix materials that are created will be placed in the relevant appendixes, in keeping with the technical manual's role as a "living document."

APPENDIX 3

Test Development Procedures

Table A-3.1: SAT Reading Test Content Specifications

	Number	Percentage of Test
Time Allotted	65 minutes	
Passage Word Count	3,250 words total from 4 single passages and 1 pair; 500–750 words per passage or paired set	
Total Questions	52 questions	100%
Multiple choice (4 options)		100%
Passage based		100%
Contribution of Items to Subscores and Scores		
Words in Context	10 questions	19%
Command of Evidence	10 questions	19%
Analysis in History/Social Studies	21 questions (all History/ Social Studies questions)	40%
Analysis in Science	21 questions (all Science questions)	40%
Passage Contents		
U.S. and World Literature	1 passage; 10 questions	20%
History/Social Studies	2 passages, or 1 passage and 1 pair; 10–11 questions each	40%
Science	2 passages, or 1 passage and 1 pair; 10–11 questions each	40%
Graphics		
1–2 graphics in 1 History/Social Studies and 1 Science passage		
Text and Graphical Complexity		
Text complexity	A range from grades 9–10 to postsecondary entry across 4 passages and 1 pair	
Graphical data representations (tables, graphs, charts, etc.)	Somewhat challenging to challenging (moderate to moderately high data density, few to several variables, moderately challenging to moderately complex interactions)	

Table A-3.2: SAT Reading Domain

Content Dimension	Description
Text Complexity	The passages/pair on the SAT Reading Test represent a range of text complexities from grades 9–10 to postsecondary entry.
Information and Ideas	These questions focus on the informational content of text.
Reading closely	These questions focus on the explicit and implicit meaning of text and on extrapolating beyond the information and ideas in a text.
Determining explicit meanings	The student will identify information and ideas explicitly stated in text.
Determining implicit meanings	The student will draw reasonable inferences and logical conclusions from text.
Using analogical reasoning	The student will extrapolate in a reasonable way from the information and ideas in a text or apply information and ideas in a text in a principled way to a new, analogous situation.
Citing textual evidence	The student will cite the textual evidence that best supports a given claim or point.
Determining central ideas and themes	The student will identify explicitly stated central ideas or themes in text and determine implicit central ideas or themes from text.
Summarizing	The student will identify a reasonable summary of a text or of key information and ideas in text.
Understanding relationships	The student will identify explicitly stated relationships or determine implicit relationships between and among individuals, events, or ideas (e.g., cause–effect, comparison–contrast, sequence).
Interpreting words and phrases in context	The student will determine the meaning of words and phrases in context.
Rhetoric	These questions focus on words and phrases in context and on the rhetorical analysis of text.
Analyzing word choice	The student will determine how the selection of specific words and phrases or the use of patterns of words and phrases shapes meaning and tone in text.
Analyzing text structure	These questions focus on the overall structure of a text and on the relationship between a particular part of a text and the whole text.
Analyzing overall text structure	The student will describe the overall structure of a text.
Analyzing part–whole relationships	The student will analyze the relationship between a particular part of a text (e.g., a sentence) and the whole text.
Analyzing point of view	The student will determine the point of view or perspective from which a text is related or the influence this point of view or perspective has on content and style.
Analyzing purpose	The student will determine the main or most likely purpose of a text or of a particular part of a text (typically, one or more paragraphs).

Table A-3.2 continued on next page

Table A-3.2 continued from previous page

Content Dimension	Description
Analyzing arguments	These questions focus on analyzing arguments for their content and structure.
Analyzing claims and counterclaims	The student will identify claims and counterclaims explicitly stated in text or determine implicit claims and counterclaims from text.
Assessing reasoning	The student will assess an author's reasoning for soundness.
Analyzing evidence	The student will assess how an author uses or fails to use evidence to support a claim or counterclaim.
Synthesis	These questions focus on synthesizing multiple sources of information and on analyzing arguments.
Analyzing quantitative information	The student will analyze information presented quantitatively in such forms as graphs, charts, and tables and relate that information to information presented in text.
Analyzing multiple texts	The student will synthesize information and ideas from paired texts. (Note: All of the skills listed above may be tested with either single or paired passages.)

Table A-3.3: SAT Writing and Language Test Content Specifications

	Number	Percentage of Test
Time Allotted	35 minutes	
Word Count	1,700 words total from 4 passages; 400–450 words per passage	
Total Questions	44 questions	100%
Multiple choice (4 options)		100%
Passage based		100%
Contribution of Items to Subscores and Scores		
Expression of Ideas	24 questions	55%
Standard English Conventions	20 questions	45%
Words in Context	8 questions (2 questions per passage)	18%
Command of Evidence	8 questions (2 questions per passage)	8%
Analysis in History/Social Studies	6 questions (all Expression of Ideas questions in History/Social Studies)	14%
Analysis in Science	6 questions (all Expression of Ideas questions in Science)	14%
Passage Contents		
Careers	1 passage; 11 questions	25%
History/Social Studies	1 passage; 11 questions	25%
Humanities	1 passage; 11 questions	25%
Science	1 passage; 11 questions	25%
Graphics		
1 or more graphics in 1 or more sets of questions		
Text Types		
Argument	1–2 passages	25%–50%
Informative/Explanatory Text	1–2 passages	25%–50%
Nonfiction Narrative	1 passage	25%
Text and Graphical Complexity		
Text complexity	A range from grades 9–10 to postsecondary entry across 4 passages	
Graphical data representations (tables, charts, graphs, etc.)	Basic to somewhat challenging (low to moderate data density, few variables, simple to moderately challenging interactions)	

Table A-3.4: SAT Writing and Language Domain

Content Dimension	Description
Text Complexity	The passages on the SAT Writing and Language Test represent a range of text complexities from grades 9–10 to postsecondary entry.
Expression of Ideas	These questions focus on revision of text for topic development, accuracy (consistency between text and graphic[s]), logic, cohesion, and rhetorically effective use of language.
Development	These questions focus on revising text in relation to rhetorical purpose. (Prior knowledge of the topic is not assessed, though consistency of the material within a passage may be.)
Proposition	The student will add, revise, or retain central ideas, main claims, counterclaims, topic sentences, and the like to structure text and convey arguments, information, and ideas clearly and effectively.
Support	The student will add, revise, or retain information and ideas (e.g., details, facts, statistics) intended to support claims or points in text.
Focus	The student will add, revise, retain, or delete information and ideas in text for the sake of relevance to topic and purpose.
Quantitative information	The student will relate information presented quantitatively in such forms as graphs, charts, and tables to information presented in text.
Organization	These questions focus on revision of text to improve the logic and cohesion of text at the sentence, paragraph, and whole-text levels.
Logical sequence	The student will revise text as needed to ensure that information and ideas are presented in the most logical order.
Introductions, conclusions, and transitions	The student will revise text as needed to improve the beginning or ending of a text or to ensure that transition words, phrases, or sentences are used effectively to connect information and ideas.
Effective language use	These questions focus on revision of text to improve the use of language to accomplish particular rhetorical purposes.
Precision	The student will revise text as needed to improve the precision of word choice.
Concision	The student will revise text as necessary to improve the economy of word choice (i.e., to eliminate wordiness and redundancy).
Style and tone	The student will revise text as necessary to ensure consistency of style and tone within a text or to improve the match of style and tone to purpose.
Syntax	The student will use various sentence structures to accomplish specified rhetorical purposes.

Table A-3.4 continued on next page

Table A-3.4 continued from previous page

Content Dimension	Description
Standard English Conventions	These questions focus on editing text to ensure conformity to the conventions of standard written English sentence structure, usage, and punctuation.
Sentence structure	These questions focus on editing text to correct problems in sentence formation and inappropriate shifts in construction within and between sentences.
Sentence formation	These questions focus on editing text to correct problems with forming grammatically complete and standard sentences.
<i>Sentence boundaries</i>	The student will recognize and correct grammatically incomplete sentences (e.g., rhetorically inappropriate fragments and run-ons).
<i>Subordination and coordination</i>	The student will recognize and correct problems in coordination and subordination in sentences.
<i>Parallel structure</i>	The student will recognize and correct problems in parallel structure in sentences.
<i>Modifier placement</i>	The student will recognize and correct problems in modifier placement (e.g., misplaced or dangling modifiers).
Inappropriate shifts in construction	These questions focus on editing text to correct inappropriate shifts in verb tense, voice, and mood and pronoun person and number.
<i>Verb tense, mood, and voice</i>	The student will recognize and correct inappropriate shifts in verb tense, voice, and mood within and between sentences.
<i>Pronoun person and number</i>	The student will recognize and correct inappropriate shifts in pronoun person and number within and between sentences.
Conventions of Usage	These questions focus on editing text to ensure conformity to the conventions of standard written English usage.
Pronouns	These questions focus on the proper use of pronouns.
<i>Pronoun clarity</i>	The student will recognize and correct pronouns with unclear or ambiguous antecedents.
Possessive determiners	The student will recognize and correct cases in which possessive determiners (<i>its, your, their</i>), contractions (<i>it's, you're, they're</i>), and adverbs (<i>there</i>) are confused with each other.
Agreement	These questions focus on ensuring grammatical agreement.
<i>Pronoun–antecedent agreement</i>	The student will recognize and correct lack of agreement between pronoun and antecedent.
<i>Subject–verb agreement</i>	The student will recognize and correct lack of agreement between subject and verb.
<i>Noun agreement</i>	The student will recognize and correct lack of agreement between nouns.
Frequently confused words	The student will recognize and correct instances in which a word or phrase is confused with another (e.g., <i>accept/except, allusion/illusion</i>).

Table A-3.4 continued on next page

Table A-3.4 continued from previous page

Content Dimension	Description
Logical comparison	The student will recognize and correct cases in which unlike terms are compared.
Conventional expression	The student will recognize and correct cases in which a given expression is inconsistent with standard written English.
Conventions of Punctuation	These questions focus on editing text to ensure conformity to the conventions of standard written English punctuation.
End-of-sentence punctuation	The student will recognize and correct inappropriate uses of ending punctuation in cases in which the context makes the intent clear.
Within-sentence punctuation	The student will correctly use and recognize and correct inappropriate uses of colons, semicolons, and dashes to indicate sharp breaks in thought within sentences.
Possessive nouns and pronouns	The student will recognize and correct inappropriate uses of possessive nouns and pronouns as well as differentiate between possessive and plural forms.
Items in a series	The student will correctly use and recognize and correct inappropriate uses of punctuation (commas and sometimes semicolons) to separate items in a series.
Nonrestrictive and parenthetical elements	The student will correctly use punctuation (commas, parentheses, dashes) to set off nonrestrictive and parenthetical sentence elements as well as recognize and correct cases in which restrictive sentence elements are inappropriately set off with punctuation.
Unnecessary punctuation	The student will recognize and correct cases in which unnecessary punctuation appears in a sentence.

Table A-3.5: SAT Math Test Content Specifications

	Number	Percentage of Test
Time Allotted: Total	80 minutes	
Calculator Portion (38 questions worth 38 points)	55 minutes	
No-Calculator Portion (20 questions worth 20 points)	25 minutes	
Total Items	58 questions	100%
Multiple choice (MC, 4 options)	45 questions	78%
Student-produced response (SPR—grid-in)	13 questions	22%
Contribution of Items to Subscores		
Heart of Algebra	19 questions	33%
▪ Analyzing and fluently solving equations and systems of equations		
▪ Creating expressions, equations, and inequalities to represent relationships between quantities and to solve problems		
▪ Rearranging and interpreting formulas		
Problem Solving and Data Analysis	17 questions	29%
▪ Creating and analyzing relationships using ratios, proportions, percentages, and units		
▪ Describing relationships shown graphically		
▪ Summarizing qualitative and quantitative data		
Passport to Advanced Math	16 questions	28%
▪ Rewriting expressions using their structure		
▪ Creating, analyzing, and fluently solving quadratic and higher-order equations		
▪ Manipulating polynomials purposefully to solve problems		
Additional Topics in Math*	6 questions	10%
▪ Making area and volume calculations in context		
▪ Investigating lines, angles, triangles, and circles using theorems		
▪ Working with trigonometric functions		
Contribution of Items to Across-Test Scores		
Analysis in Science	8 questions	14%
Analysis in History/Social Studies	8 questions	14%

*Questions under Additional Topics in Math contribute to the total Math Test score but do not contribute to a subscore within the Math Test.

Table A-3.6: SAT Math Test Domains

Content Dimension	Description
Linear equations in one variable	<p style="text-align: center;">Heart of Algebra</p> <ul style="list-style-type: none">▪ Create and use linear equations in one variable to solve problems in a variety of contexts.▪ Create a linear equation in one variable, and when in context interpret solutions in terms of the context.▪ Solve a linear equation in one variable, making strategic use of algebraic structure.▪ For a linear equation in one variable:<ul style="list-style-type: none">◆ interpret a constant, variable, factor or term in a context; and◆ determine the conditions under which the equation has no solution, a unique solution, or infinitely many solutions.▪ Fluently solve a linear equation in one variable.
Linear functions	<p>Algebraically, a linear function can be defined by a linear expression in one variable or by a linear equation in two variables. In the first case, the variable is the input and the value of the expression is the output. In the second case, one of the variables is designated as the input and determines a unique value of the other variable, which is the output.</p> <ul style="list-style-type: none">▪ Create and use linear functions to solve problems in a variety of contexts.▪ Create a linear function to model a relationship between two quantities.▪ For a linear function that represents a context:<ul style="list-style-type: none">◆ interpret the meaning of an input/output pair, constant, variable, factor, or term based on the context, including situations where seeing structure provides an advantage;◆ given an input value, find and/or interpret the output value using the given representation; and◆ given an output value, find and/or interpret the input value using the given representation, if it exists.▪ Make connections between verbal, tabular, algebraic, and graphical representations of a linear function by:<ul style="list-style-type: none">◆ deriving one representation from the other;◆ identifying features of one representation given another representation; and◆ determining how a graph is affected by a change to its equation.▪ Write the rule for a linear function given two input/output pairs or one input/output pair and the rate of change.

Table A-3.6 continued on next page

Table A-3.6 continued from previous page

Content Dimension	Description
Linear equations in two variables	<p>A linear equation in two variables can be used to represent a constraint or condition on two-variable quantities in situations where neither of the variables is regarded as an input or an output. A linear equation can also be used to represent a straight line in the coordinate plane.</p> <ul style="list-style-type: none"> ▪ Create and use a linear equation in two variables to solve problems in a variety of contexts. ▪ Create a linear equation in two variables to model a constraint or condition on two quantities. ▪ For a linear equation in two variables that represents a context: <ul style="list-style-type: none"> ◆ interpret a solution, constant, variable, factor, or term based on the context, including situations where seeing structure provides an advantage; and ◆ given a value of one quantity in the relationship, find a value of the other, if it exists. ▪ Make connections between tabular, algebraic, and graphical representations of a linear equation in two variables by: <ul style="list-style-type: none"> ◆ deriving one representation from the other; ◆ identifying features of one representation given the other representation; and ◆ determining how a graph is affected by a change to its equation. ▪ Write an equation for a line given two points on the line, one point and the slope of the line, or one point and a parallel or perpendicular line.
Systems of two linear equations in two variables	<ul style="list-style-type: none"> ▪ Create and use a system of two linear equations in two variables to solve problems in a variety of contexts. ▪ Create a system of linear equations in two variables, and when in context interpret solutions in terms of the context. ▪ Make connections between tabular, algebraic, and graphical representations of the system by deriving one representation from the other. ▪ Solve a system of two linear equations in two variables, making strategic use of algebraic structure. ▪ For a system of linear equations in two variables: <ul style="list-style-type: none"> ◆ interpret a solution, constant, variable, factor, or term based on the context, including situations where seeing structure provides an advantage; and ◆ determine the conditions under which the system has no solution, a unique solution, or infinitely many solutions. ▪ Fluently solve a system of linear equations in two variables.
Linear inequalities in one or two variables	<ul style="list-style-type: none"> ▪ Create and use linear inequalities in one or two variables to solve problems in a variety of contexts. ▪ Create linear inequalities in one or two variables, and when in context interpret the solutions in terms of the context. ▪ For linear inequalities in one or two variables, interpret a constant, variable, factor, or term, including situations where seeing structure provides an advantage. ▪ Make connections between tabular, algebraic, and graphical representations of linear inequalities in one or two variables by deriving one from the other. ▪ Given a linear inequality or system of linear inequalities, interpret a point in the solution set.

Problem Solving and Data Analysis	
Ratios, rates, proportional relationships, and units	<ul style="list-style-type: none"> ▪ Items will require students to solve problems by using a proportional relationship between quantities, calculating or using a ratio or rate, and/or using units, derived units, and unit conversion. ▪ Apply proportional relationships, ratios, rates, and units in a wide variety of contexts. Examples include, but are not limited to, scale drawings and problems in the natural and social sciences. ▪ Solve problems involving: <ul style="list-style-type: none"> ◆ derived units, including those that arise from products (e.g., kilowatt-hours) and quotients (e.g., population per square kilometer); and ◆ unit conversion, including currency exchange and conversion between different measurement systems. ▪ Understand and use the fact that when two quantities are in a proportional relationship, if one changes by a scale factor, then the other also changes by the same scale factor.
Percentages	<ul style="list-style-type: none"> ▪ Use percentages to solve problems in a variety of contexts. Examples include, but are not limited to, discounts, interest, taxes, tips, and percent increases and decreases for many different quantities. ▪ Understand and use the relationship between percent change and growth factor (e.g., 5% and 1.05); include percentages greater than or equal to 100%.
One-variable data: distribution and measures of center and spread	<ul style="list-style-type: none"> ▪ Choose an appropriate graphical representation for a given data set. ▪ Interpret information from a given representation of data in context. ▪ Analyze and interpret numerical data distributions represented with frequency tables, histograms, dot plots, and boxplots. ▪ For quantitative variables, calculate, compare, and interpret mean, median, and range. Interpret (but don't calculate) standard deviation. ▪ Compare distributions using measures of center and spread, including distributions with different means and the same standard deviations and ones with the same mean and different standard deviations. ▪ Understand and describe the effect of outliers on mean and median. ▪ Given an appropriate data set, calculate the mean.
Two-variable data: models and scatterplots	<ul style="list-style-type: none"> ▪ Using a model that fits the data in a scatterplot, compare values predicted by the model to values given in the data set. ▪ Interpret the slope and intercepts of the line of best fit in context. ▪ Given a relationship between two quantities, read and interpret graphs and tables modeling the relationship. ▪ Analyze and interpret data represented in a scatterplot or line graph; fit linear, quadratic, and exponential models. ▪ Select a graph that represents a context, identify a value on a graph, or interpret information on the graph. ▪ For a given function type (linear, quadratic, exponential), choose the function of that type that best fits given data. ▪ Compare linear and exponential growth. ▪ Estimate the line of best fit for a given scatterplot; use the line to make predictions

Content Dimension	Description
Reading	Comprehension of the source text Understanding of central ideas, important details, and their interrelationship Accuracy in representation of the source text (i.e., no errors of fact or interpretation introduced) Use of textual evidence (quotations, paraphrases, or both) to demonstrate understanding of the source text
Analysis	Analysis of the source text and understanding of the analytical task Evaluation of the author's use of evidence, reasoning, and/or stylistic and persuasive elements, and/or features chosen by the student Support for claims or points made in the response Focus on features of the text most relevant to addressing the task
Writing	Use of a central claim Use of effective organization and progression of ideas Use of varied sentence structures Employment of precise word choice Maintenance of a consistent, appropriate style and tone Command of the conventions of standard written English

Table A-3.15: SAT Essay Evaluation Criteria

Reading	Analysis	Writing
The Reading domain encompasses students' comprehension of a source text, including the text's central ideas and important details and how they interrelate. Students demonstrate their skill in comprehension in part by making effective use of evidence (quotations, paraphrases, or both) from the source text.	The Analysis domain encompasses students' evaluation of an author's use of evidence, reasoning, and/or stylistic and persuasive elements, and/or features of the text of the students' own choosing. Students demonstrate their skill in analysis in part by using relevant, sufficient, and strategically chosen support for the claims or points they make and by focusing consistently on those features of the text that are most relevant to addressing the task.	The Writing domain encompasses the cohesiveness of students' written response to the task as well as students' use of language. Students demonstrate their skill in writing in part by providing a precise central claim; creating an effective organization and progression of ideas; successfully employing a variety of sentence structures; using precise word choice; maintaining an appropriate style and tone; and showing command of the conventions of standard written English.

Table A-5.1: SAT Essay Scoring Rubric

Score	Reading	Analysis	Writing
4	<p>Advanced: The response demonstrates thorough comprehension of the source text.</p> <p>The response shows an understanding of the text's central idea(s) and of most important details and how they interrelate, demonstrating a comprehensive understanding of the text.</p> <p>The response is free of errors of fact or interpretation with regard to the text.</p> <p>The response makes skillful use of textual evidence (quotations, paraphrases, or both), demonstrating a complete understanding of the source text.</p>	<p>Advanced: The response offers an insightful analysis of the source text and demonstrates a sophisticated understanding of the analytical task.</p> <p>The response offers a thorough, well-considered evaluation of the author's use of evidence, reasoning, and/or stylistic and persuasive elements and/or feature(s) of the student's own choosing.</p> <p>The response contains relevant, sufficient, and strategically chosen support for claim(s) or point(s) made.</p> <p>The response focuses consistently on those features of the text that are the most relevant to addressing the task.</p>	<p>Advanced: The response is cohesive and demonstrates a highly effective use and command of language.</p> <p>The response includes a precise central claim.</p> <p>The response includes a skillful introduction and conclusion. The response demonstrates a deliberate and highly effective progression of ideas both within paragraphs and throughout the essay.</p> <p>The response has a wide variety in sentence structures. The response demonstrates a consistent use of precise word choice. The response maintains a formal style and objective tone.</p> <p>The response shows a strong command of the conventions of standard written English and is free or virtually free of errors.</p>
3	<p>Proficient: The response demonstrates effective comprehension of the source text.</p> <p>The response shows an understanding of the text's central idea(s) and important details.</p> <p>The response is free of substantive errors of fact and interpretation with regard to the text.</p> <p>The response makes appropriate use of textual evidence (quotations, paraphrases, or both), demonstrating an understanding of the source text.</p>	<p>Proficient: The response offers an effective analysis of the source text and demonstrates an understanding of the analytical task.</p> <p>The response competently evaluates the author's use of evidence, reasoning, and/or stylistic and persuasive elements and/or feature(s) of the student's own choosing.</p> <p>The response contains relevant and sufficient support for claim(s) or point(s) made.</p> <p>The response focuses primarily on those features of the text that are the most relevant to addressing the task.</p>	<p>Proficient: The response is mostly cohesive and demonstrates effective use and control of language.</p> <p>The response includes a central claim or implicit controlling idea.</p> <p>The response includes an effective introduction and conclusion. The response demonstrates a clear progression of ideas both within paragraphs and throughout the essay.</p> <p>The response has variety in sentence structures. The response demonstrates some precise word choice. The response maintains a formal style and objective tone.</p> <p>The response shows a good control of the conventions of standard written English and is free of significant errors that detract from the quality of writing.</p>

Table A-5.1 continued on next page

Table A-5.1 continued from previous page

Score	Reading	Analysis	Writing
2	<p>Partial: The response demonstrates some comprehension of the source text.</p> <p>The response shows an understanding of the text's central idea(s) but not of important details.</p> <p>The response may contain errors of fact and/or interpretation with regard to the text.</p> <p>The response makes limited and/or haphazard use of textual evidence (quotations, paraphrases, or both), demonstrating some understanding of the source text.</p>	<p>Partial: The response offers limited analysis of the source text and demonstrates only partial understanding of the analytical task.</p> <p>The response identifies and attempts to describe the author's use of evidence, reasoning, and/or stylistic and persuasive elements and/or feature(s) of the student's own choosing but merely asserts rather than explains their importance.</p> <p>One or more aspects of the analysis reflected in the response are unwarranted based on the text.</p> <p>The response contains little or no support for claim(s) or point(s) made.</p> <p>The response may lack a clear focus on those features of the text that are the most relevant to addressing the task.</p>	<p>Partial: The response demonstrates little or no cohesion and limited skill in the use and control of language.</p> <p>The response may lack a clear central claim or controlling idea or may deviate from the claim or idea over the course of the response.</p> <p>The response may include an ineffective introduction and/or conclusion. The response may demonstrate some progression of ideas within paragraphs but not throughout the response.</p> <p>The response has limited variety in sentence structures; sentence structures may be repetitive.</p> <p>The response demonstrates general or vague word choice; word choice may be repetitive. The response may deviate noticeably from a formal style and objective tone.</p> <p>The response shows a limited control of the conventions of standard written English and contains errors that detract from the quality of writing and may impede understanding.</p>
1	<p>Inadequate: The response demonstrates little or no comprehension of the source text.</p> <p>The response fails to show an understanding of the text's central idea(s) and may include only details without reference to central idea(s).</p> <p>The response may contain numerous errors of fact and/or interpretation with regard to the text.</p> <p>The response makes little or no use of textual evidence (quotations, paraphrases, or both), demonstrating little or no understanding of the source text.</p>	<p>Inadequate: The response offers little or no analysis or an ineffective analysis of the source text and demonstrates little or no understanding of the analytic task.</p> <p>The response identifies without explanation some aspects of the author's use of evidence, reasoning, and/or stylistic and persuasive elements and/or feature(s) of the student's choosing.</p> <p>Numerous aspects of the response's analysis are unwarranted based on the text.</p> <p>The response contains little or no support for claim(s) or point(s) made, or support is largely irrelevant.</p> <p>The response may not focus on features of the text that are relevant to addressing the task.</p> <p>The response offers no discernible analysis (e.g., is largely or exclusively summary).</p>	<p>Inadequate: The response demonstrates little or no cohesion and inadequate skill in the use and control of language.</p> <p>The response may lack a clear central claim or controlling idea.</p> <p>The response lacks a recognizable introduction and conclusion.</p> <p>The response does not have a discernible progression of ideas.</p> <p>The response lacks variety in sentence structures; sentence structures may be repetitive. The response demonstrates general and vague word choice; word choice may be poor or inaccurate. The response may lack a formal style and objective tone.</p> <p>The response shows a weak control of the conventions of standard written English and may contain numerous errors that undermine the quality of writing.</p>

Exhibit A-5.1

p-Values and Deltas

For a dichotomously-scored item, the *p*-value denotes the average item score and the proportion correct,

$$\varphi_i = \frac{1}{N_{\text{reached},i}} \sum_t x_{it}$$

where x_{it} indicates the correct (= 1) and incorrect (= 0) scores on item i for the t^{th} test taker. For the *p*-values reported in this manual, $N_{\text{reached},i}$ is the number of test takers who reached item i and not necessarily the total number of test takers (i.e., the *p*-values are referred to as "P-Pluses" rather than "P-Totals").

Item *p*-values are often transformed into "deltas," which are normally distributed with a mean of 13 and standard deviation of 4,

$$\Delta_i = 13 - 4\Phi^{-1}(\varphi_i)$$

where $\Phi^{-1}(\varphi_i)$ represents the inverse of the standard normal cumulative distribution corresponding to φ_i th percentile. Deltas differ from *p*-values in that larger delta values indicate greater item difficulty, and the two sets of item deltas from two examinee groups are more likely to be linearly related than the corresponding sets of item *p*-values.

Equated Deltas and *p*-Values

In current item analysis practice described in Section 3.2 in Chapter 3 and Section 5.1 in Chapter 5, the *p*-values and deltas for all items are converted to a common scale so that all item difficulties are based on the same reference group of examinees. These conversions involve obtaining two sets of *p*-values for two examinee groups (1 and 2, where 2 is the reference group), transforming both sets of *p*-values into deltas, and exploiting the linear relationship of the two sets of deltas with a linear equating function (e.g., Section 6.2 in Chapter 6). The linear equating function for converting the item delta of group 1 to the scale (i.e., mean and standard deviation) of the deltas for group 2 for item i can be expressed as

$$l_2(\Delta_{i,1}) = \bar{\Delta}_2 + \frac{SD_{\Delta_2}}{SD_{\Delta_1}} [\Delta_{i,1} - \bar{\Delta}_1]$$

where the $\bar{\Delta}$ s and SD_{Δ} s denote the means and standard deviations estimated from two groups of deltas for the same set of items. Finally, equated p -values can be obtained by applying the inverse of the delta transformation to the linearly equated deltas,

$$p_{i,2} = \Phi \left[\frac{13 - l_2(\Delta_{i,1})}{4} \right]$$

r-Biserial Correlation

The formula for the r -biserial correlation is (Lord & Novick, 1968):

$$r\text{-biserial}_{l_i,Y} = \left(\frac{\bar{Y}_{x_i=1} - \bar{Y}_{x_i=0}}{SD_y} \right) \left(\frac{\varphi_i(1-\varphi_i)}{h} \right)$$

where

$\bar{Y}_{x_i=1}$ is the criterion score average for students answering item i correctly,

$\bar{Y}_{x_i=0}$ is the criterion score average for students answering item i incorrectly,

SD_y is the standard deviation of the criterion score,

φ_i is the proportion of students answering item i correctly (i.e., p -value), and

$h = \frac{e^{-u^2/2}}{\sqrt{2\pi}}$ where u is defined such that $Pr[Z \geq u | Z \sim N(0,1)] = \varphi_i$

MH D-DIF

Based on the formulas from Dorans and Holland (1993), the Mantel-Haenszel D-DIF (MH D-DIF) statistic is calculated for subgroups of gender and ethnicity/race with the following formula

$$MH\ D\text{-DIF} = -2.35 \ln[\alpha_{MH}]$$

where α_{MH} is an estimate of the odds ratio. The odds ratio is calculated as

$$\alpha_{MH} = \frac{\sum_m R_{rm} \frac{W_{fm}}{N_{tm}}}{\sum_m R_{fm} \frac{W_{rm}}{N_{tm}}}$$

where

R_{rm} is the number of students answering correctly in the reference group at ability level m ,

W_{fm} is the number of students answering incorrectly in the focal group at ability level m ,

N_{tm} is the number of students in the total group at ability level m ,

R_{fm} is the number of students answering correctly in the focal group at ability level m , and

W_{rm} is the number of students answering incorrectly in the reference group at ability level m .

MH D-DIF values that aren't statistically different from zero are classified as A items. Items that exceed 1.5 in absolute value and are significantly larger than 1.0 in absolute value are classified as C items. The remaining values are classified as B items. Items classified as C items are reviewed for potential exclusion from scoring.

APPENDIX 7

Validity

Table A-7.1: Old SAT to New SAT

Old SAT	New SAT
Math (200–800)	Math section score (200–800)
Critical Reading (200–800)	Reading Test score (10–40)
Writing (200–800)	Writing and Language Test score (10–40)
Critical Reading + Writing (400–1600)	Evidence-Based Reading and Writing (ERW) section score (200–800)
Critical Reading + Math (400–1600)	Total Score (ERW + Math section; 400–1600)
Critical Reading + Math + Writing (600–2400)	Total Score (ERW + Math section; 400–1600)

Table A-7.2: Correlations Between Old SAT and New SAT Score Pairs for Concordances (Lower Diagonal from Unweighted Sample, Upper Diagonal from Weighted Sample)

	Old M	Old CR	Old W	Old CR + W	Old M + CR	Old M + CR + W	New MTS	New R	New WL	New ERW	New Total
Old M	1.000	0.759	0.764	0.794	0.940	0.910	0.880	0.700	0.735	0.750	0.864
Old CR	0.737	1.000	0.839	0.959	0.936	0.934	0.725	0.825	0.808	0.854	0.836
Old W	0.737	0.820	1.000	0.959	0.854	0.935	0.719	0.758	0.805	0.817	0.814
Old CR + W	0.773	0.955	0.953	1.000	0.933	0.974	0.753	0.825	0.841	0.872	0.860
Old M + CR	0.934	0.930	0.834	0.925	1.000	0.983	0.857	0.812	0.822	0.855	0.907
Old M + CR + W	0.901	0.927	0.926	0.971	0.981	1.000	0.838	0.821	0.844	0.871	0.905
New MTS	0.868	0.702	0.691	0.730	0.844	0.823	1.000	0.735	0.758	0.781	0.945
New R	0.679	0.810	0.736	0.811	0.798	0.807	0.717	1.000	0.827	0.956	0.895
New WL	0.715	0.789	0.785	0.825	0.806	0.830	0.740	0.811	1.000	0.956	0.907
New ERW	0.732	0.840	0.799	0.859	0.843	0.860	0.765	0.952	0.951	1.000	0.943
New Total	0.852	0.821	0.793	0.846	0.897	0.896	0.940	0.888	0.900	0.939	1.000

MTS = Math; R = Reading; W = Writing; WL = Writing and Language; CR = Critical Reading; ERW = Evidence-Based Reading and Writing.

Table A-7.3: Demographic Characteristics of the Unweighted SAT Concordance Data
Overall Descriptive Statistics for the Unweighted Total Group (N = 8,677)

Subject	New SAT Mean (SD)	Corr.	Old SAT Mean (SD)	Old SAT Mean (SD) (Cohort)
Reading	26.97 (5.16)	0.810	497.22 (101.21)	496.50 (114.50)
Math	536.71 (97.96)	0.868	505.27 (104.64)	513.75 (118.00)
Writing	27.11 (5.12)	0.785	477.89 (98.97)	488.00 (114.00)

Table A-7.45: College Outcomes: By College and Career Readiness Benchmark Status

	Variable	Met College and Career Readiness Benchmark	Did Not Meet College and Career Readiness Benchmark
Four-Year College Outcomes	Enrolled in remedial coursework in first year	5.3	26.7
	Retained to second year	88.8	77.6
	Percent attaining	81.4	64.0
	Retained to third year	52.6	27.6
	Graduated in 4 years	76.1	51.9
	Graduated in 5 years	3.07	2.57
	Mean	3.25	2.90
	FYGPA	30.6	63.0
	CumGPA	85.7	80.1
	Percent attaining	71.7	62.8
Two-Year College Outcomes	Retained to third year or transferred to a 4-year school	13.5	6.7
	Graduated in 2 years	28.3	19.8
	Graduated in 3 years	2.81	2.30
	Mean	2.73	2.23
	FYGPA	10.3	6.0
	CumGPA	27.8	22.0
	Percent attaining	3.08	2.75
	Graduated in 2 years	3.26	2.94
	Graduated in 3 years	3.12	2.78
	Overall FYGPA	3.28	3.01
Workforce Training Outcomes	Overall CumGPA	Occupational FYGPA	Occupational CumGPA
	Mean	3.08	3.26
	Occupational FYGPA	3.12	3.28
	Overall CumGPA	2.75	2.94
	Occupational CumGPA	6.0	3.01

Note: Remedial coursework at 2-year institutions is defined as coursework for which either no credit is awarded or for which credits can't be applied toward a degree. Remedial coursework at a 4-year college is defined as coursework for which credit can't be applied toward graduation.

Table A-7.46: College Outcomes in Social Science/History, Literature, and Writing Courses: By Evidence-Based Reading and Writing Benchmark Status

		Variable	Met the ERW Benchmark	Did Not Meet the ERW Benchmark
Four-Year College Outcomes	Percent	Enrolled in Reading/Writing remedial coursework in first year	4.0	25.5
	Mean	Literature/Social Science/History/Writing FYGPA	3.02	2.29
Two-Year College Outcomes	Percent	Enrolled in Reading/Writing remedial coursework in first year	15.7	52.9
	Mean	Literature/Social Science/History/Writing FYGPA	2.71	2.03

Table A-7.47: College Outcomes in Math Courses: By Math Benchmark Status

		Variable	Met the Math Benchmark	Did Not Meet the Math Benchmark
Four-Year College Outcomes	Percent	Enrolled in Math remedial coursework in first year	2.7	17.5
	Mean	Math FYGPA	2.79	2.14
Two-Year College Outcomes	Percent	Enrolled in Math remedial coursework in first year	3.1	27.7
	Mean	Math FYGPA	2.50	1.94
