RHODE ISLAND'S SOCIAL STUDIES ANCHOR STANDARDS

OVERVIEW

The Rhode Island Social Studies Anchor Standards, which are displayed on the following pages, are intended to support the principle of depth over breadth by providing a consistent throughline from kindergarten through high school. To meet this objective, there are twelve anchor standards. These twelve standards are divided into four domains: Civics and Government, History, Geography, and Economics. These anchor standards apply across all grade levels and high school courses and are designed to inform teaching of all social studies content as identified in the content standards. The following image displays the four domains and the title of the three standards within each.

Civics and Government

Power Rules and Laws Rights and Responsibilities

History

Change / Continuity
Historical Perspectives
Individuals / Groups

Rhode Island's Social Studies Anchor Standards

Geography

Human, Physical, and Environmental Interactions Human Systems and Populations The World in Spatial terms

Economics

Scarcity / Abundance Producers / Consumers Economics / Government

The following pages outline the anchor standards in full by domain. Each of the anchor standards include the four-part hierarchy of rigor – *identify, explain, analyze,* and *argue* – as explained earlier in this document and cultural responsiveness is woven within the hierarchy. The codes following the anchor standards will appear again later in this document within the standards tables for easy reference back to the following list of anchor standards. For example, CG.P refers to the Civics and Government – Power anchor standard.

Power (CG.P)

Students act as informed citizens as they...

- 1. *Identify* what political power is and who has political power in a society.
- 2. *Explain* how political power is and has been obtained and used to govern communities and individuals with attention to their intersectional identities and lived experiences.
- 3. Analyze the purpose of government and the use of power, including balancing order and freedom, to advance and control different communities and individuals based on their intersectional identities and lived experiences.
- 4. *Argue* how power can be distributed and used to create a more equitable society for communities and individuals based on their intersectional identities and lived experiences.

Rules and Laws (CG.RL)

Students act as informed citizens as they...

- 1. *Identify* what rules and laws are, and who has the power to make them, in different settings and cultures that are familiar and unfamiliar to students.
- 2. *Explain* why rules and laws exist, and how they are implemented by and for individuals and communities based on their intersectional identities and lived experiences.
- 3. Analyze how rules and laws positively and/or negatively impact different individuals and communities based on their intersectional identities and lived experiences.
- 4. Argue how rules and laws can be used to create an equitable society.

Rights and Responsibilities (CG.RR)

Students act as informed citizens as they...

- 1. *Identify* what rights and responsibilities individuals and communities have in a society and who can take advantage of them.
- 2. *Explain* different ways communities and individuals inform themselves, exercise their rights and responsibilities, and engage formally and/or informally in political processes.
- 3. Analyze how individuals and communities have been included or excluded from the political process based on their intersectional identities and lived experiences and the impact these actions have had on their rights, responsibilities, and the functioning of a democratic society.
- 4. Argue for a possible solution to make rights equitable and the roles of those involved in pursuing that solution.

Change / Continuity (H.CC)

Students act as historians as they...

- 1. *Identify* historical events that are culturally relevant to global, national, and local histories and connect to students' intersectional identities and lived experiences.
- 2. *Explain* multiple causes and effects of historical events, centering and representing the voices and experiences of individuals and communities who were agents of change and resistance.
- 3. *Analyze* multiple sources to compare and contrast historical events through the lenses of identity, power, and resistance.
- 4. Argue how social change, intersectional identities, and lived experiences are crucial to the study and practice of history.

Historical Perspectives (H.HP)

Students act as historians as they...

- Identify key people, central ideas, and the mechanisms by which stories are told and retold regarding an event or series of events, centering the voices of historical actors and groups engaged in resistance and change.
- 2. *Explain* the purpose, audience, and perspective of multiple types of sources (art, music, oral histories, pamphlets, film, texts, etc.) relating to a historical event or series of events, individual, or group of people, including indications of bias toward or against the subject portrayed.
- 3. Analyze multiple types of sources, including art, music, oral histories, pamphlets, film, texts, etc., through a critical reflection of the creators' and students' intersectional identities and lived experiences.
- 4. *Argue*, using multiple narratives rooted in identity, power, and resistance, how history itself is an interpretation of events.

Individuals / Groups (H.IG)

Students act as historians as they...

- 1. *Identify* peoples, events, technologies, and ideas involved in historical and social change in various geographical and temporal locations.
- 2. *Explain* how historical and social change have been and continue to be accomplished in relation to systems of power, identity, and resistance.
- 3. Analyze historical change through the intersectional identities and lived experiences of people who have accomplished social change throughout history in relation to systems of power, identity, and resistance.
- 4. *Argue* how all individuals can act as local, national, and/or global agents of social change by using lessons learned from history.

Human, Physical, and Environmental Interactions (G.HPE)

Students act as geographers as they...

- 1. *Identify* the characteristics of human systems, physical systems, and the environment, and ways they interact at local, regional and/or global levels.
- 2. Explain how humans and their societies and institutions affect, modify and/or preserve the environment, as well as how the modifications of the physical environment affect physical, behavioral, and diverse cultural systems.
- 3. *Analyze* how individuals and societies at local, regional and/or global levels influence political, economic, and social decision-making.
- 4. Argue how decisions about resources and the environment made by individuals and/or communities impact current and future peoples differently and how those decisions might be made more equitable.

Human Systems and Populations (G.HSP)

Students act as geographers as they...

- 1. *Identify* the characteristics of populations based on their size, place, region, and cultural demographics, as well as identifying patterns of migration.
- 2. *Explain* how and why a population's characteristics, including their spatial distribution, growth, and movement, have divided, organized, and unified areas of Earth's surface and impacted both human and physical systems.
- 3. *Analyze* how human systems and the distribution of populations interact with and impact physical systems, and how conflict and access to resources influence physical systems.
- 4. Argue how the relationship between populations and physical systems influence decision-making about the equitable access to resources and land at the local, regional, and/or global levels.

The World in Spatial Terms (G.WST)

Students act as geographers as they...

- 1. *Identify* maps, globes, and other geographic tools and technologies that are used to describe where places are located both absolutely and relatively across time, space, and distance.
- Explain how the characteristics and elements of maps, globes, geographic tools, and other technologies are used and selected to identify and describe local, regional and/or global locations.
- 3. Analyze multiple types of maps, charts, and graphs and how they are used to interpret topographical information, draw inferences about the development of societies, and determine how places shape events and how places may be changed by events.
- 4. *Argue* how the systematic analysis of the spatial patterns provides an integral understanding of a place or region and supports equitable decisions about climate and land use.

Scarcity / Abundance (E.SA)

Students act as economists as they...

- 1. *Identify* the choices communities make about how to use resources based on the scarcity of that resource, including those that are familiar and unfamiliar.
- 2. *Explain* how scarcity affects the cost and availability of desired goods and services, and who has the power to influence the factors related to cost and availability and why.
- Analyze how decisions affecting access to goods and services are influenced by systems of
 power and cultural norms including how these effects of decisions create more equitable or
 inequitable outcomes.
- 4. Argue how a resource can be used differently to create a more equitable outcome for individuals and communities including how individuals and communities can influence systems of power to achieve that change.

Producers / Consumers (E.PC)

Students act as economists as they...

- 1. *Identify* the individuals and communities involved in the production of any good or service, the materials needed for producing them, where and how the materials are obtained, and the various interrelationships among all of these elements.
- 2. *Explain* who has the power to make decisions related to the means of production and the effects those decisions have on individuals and communities
- 3. Analyze how individuals and communities acting through intersectional identities and lived experiences can affect the means of production.
- 4. *Argue* whether the costs and benefits of an aspect of the means of production equitably serve all individuals and communities.

Economics / Government (E.EG)

Students act as economists as they...

- 1. *Identify* the ways that different political systems utilize economic systems to organize and distribute goods and services to individuals and communities.
- 2. *Explain* how those traditionally privileged and marginalized across intersecting identities can influence and interact with economic systems.
- 3. Analyze how inequities within the economic system have been addressed or sustained by the actions of those traditionally privileged and marginalized.
- 4. *Argue* how different economic systems can create more equitable outcomes for individuals and communities, particularly for those traditionally marginalized from the economic system.
