Foreword

In 1995, the Health Education Framework and Assessment Task Force, as part of the Healthy Schools! Healthy Kids! Initiative, began work on the development of a health education framework including health education content standards for Rhode Island. In July, 1996, the Rhode Island Health Education Framework, *Health Literacy for All Students* was endorsed by the Board of Regents of Elementary and Secondary Education. In the course of the Task Force's deliberations, it became evident that the state's *Health Education Instructional Outcomes* needed to be aligned with these new standards, particularly in light of the state's move to standards-driven, instruction and performance-based assessment. In addition, the health information in the original *Outcomes* needed updating to reflect current health knowledge. Several *ad hoc* committees had been convened by the Department of Education to update the *Outcomes* periodically, but a concerted effort to review and update all of the content areas had to be undertaken. With the advent of the Health Education Framework, it became clear that now was the time to update the outcomes and align them with the new standards for health education.

A committee of teachers, a representative from higher education, consultants and Department of Education, Department of Health and Department of Mental Health, Retardation and Hospitals staff, many of whom had also served on the Framework Task Force, began meeting in February of 1997. Working with a consultant, Andrea Ferreira, this Outcomes Revision Committee carried out the task of reviewing the original *Outcomes*, updating the health information in each content area, removing redundancies, categorizing content for grade categories and developing a format in which to present the aligned outcomes and standards. The Committee met regularly from February through December to ensure accuracy, alignment with the standards, appropriateness of content, user-friendliness and compliance with state rules and regulations of these revised outcomes.

Deborah A. Gist Commissioner of Education Rhode Island Department of Education

April, 1988

Revised: July, 1992; January, 1998

August, 2003; August, 2012; March, 2015

Acknowledgments

The Rhode Island Department of Education wishes to thank all the members of the Outcomes Revision Committee for accepting the challenge of revising and aligning the *Outcomes* with the health education standards. The task was difficult, but mutual respect and good humor prevailed.

Health Education Instructional Outcomes Revision Committee:

Kenneth M. Ascoli, Bristol-Warren Regional Schools: Department Head, K-12 Physical Education and Health

Marcia Campbell, Department of Education: Health Education Specialist

Tracy Caravella, PhD, Rhode Island College, Assistant Professor, Health Education

Cynthia Y. Corbridge, Department of Education: Health Education Assessment Specialist

Carol Cummings, PhD, Health Education Consultant

Andrea V. Ferreira, MPH, CHES, Health Education Consultant

Donald P. Galamaga, Department of Mental Health, Retardation and Hospitals: Executive Director

Linda Nightingale Greenwood, Department of Education: Manager, Comprehensive School Health Programs

Jackie Harrington, Department of Education: HIV/AIDS Specialist

Wanda Lukas, Mt. Hope High School: Teacher, Health and Physical Education

Anne Maack, North Kingstown High School: Teacher, Health Education

George McDonough, *Department of Education: Coordinator, Safe and Drug-Free Schools*

Catherine Moffitt, Hope Valley Elementary School: Teacher, Health and Physical Education

Rosemary Reilly-Chammat, Department of Health: Program Manager

Kathy Santosuosso, Isaac Paine School: Teacher, Health and Physical Education

Rene Sullivan, Jamestown School Department: School Nurse-Teacher

Andrea Vastis, Department of Health: Public Health Promotion Specialist

Janet Watkinson, Newport School Department: School Nurse-Teacher

Heidi Willner, Johnston High School: Teacher, Health Education

Special recognition and enormous appreciation go to Andrea Ferreira, our consultant. Her unfailing professionalism, intelligence, patience and diligence (not to mention her ability to take the views of a dozen people and produce such fine work) have resulted in a product of which we can all be proud.

Thank you also to the *Healthy Schools! Healthy Kids!* (HS!HK!) Initiative, funded by a Cooperative Agreement (U87/CCU109023-06) with the Centers for Disease Control and Prevention (CDC) through 2002. Through this initiative health education enjoys continued support as one of seven interdependent components of a comprehensive school health program. The HS!HK! Initiative has served as a resource for and reinforcement of standards-based teaching and learning, guided by a health education framework similar to those crafted in other core areas: English Language Arts, Mathematics and Science.

Special Acknowledgements (2012)

The Rhode Island Department of Education wishes to thank Denise Johnson, Barrington Public Schools K-12 Physical Education and Health Department Head; Anna M. Burke, CSNT, M.Ed.; and Lawrence P. Filippelli, Ed.D., Assistant Superintendent, Scituate School Department for their continued support, guidance, and contributions during the 2011-2012 revision process.

Overview

This document is designed to complement the Rhode Island Health Education Framework, *Health Literacy for All Students*. It partners with the Framework to provide curriculum committees in local districts a resource to help them develop, evaluate, revise and improve existing Kindergarten (K) – 12 health education curricula.

The Framework clearly articulates the role of health education in school reform, the relationship of health education to each of the components of a comprehensive school health program as well as health literacy, and the Rhode Island *Common Core of Learning*. For a thorough understanding of the aforementioned, the reader is encouraged to read pages 1 - 8 of the Rhode Island Health Education Framework: *Health Literacy for ALL Students*.

In the Framework, Rhode Island's Health Education Standards (pages 9-20) clearly present high expectations for all students. They describe what all students should know and be able to do in health education. Performance descriptions are provided for each of the seven standards. The performance descriptions illustrate what achieving each standard looks like at four stages during a student's schooling, K, grade 4; grades 5 - 8, grades 9 - 10 and grades 11 and 12. There are strong connections between and among the standards and performance descriptions. None is an isolate. The performance descriptions formed the roots of the revised outcomes.

Rhode Island's *Rules and Regulations for School Health Programs (RI16-21-SCHO)* as amended in January 1996¹ (found in the Appendix A of the Framework), promulgate a "comprehensive, planned and sequential arrangement of learning opportunities" for students. The *Rules and Regulations* outline specific "health instructional outcomes" which include no fewer than the following topics: AIDS; alcohol, tobacco and other substance abuse; child abuse; community health; consumer health; cardiopulmonary resuscitation; environmental health; sexuality and family life; human growth and development; mental health; nutrition; prevention and control of disease; physical fitness; safety and injury prevention; and suicide prevention. To date, these outcomes have been presented by content area clusters in the Rhode Island Department of Education document *Comprehensive Health Instructional Outcomes*, published in April, 1988 and revised in July, 1992. The outcomes that follow this introduction were aligned with the seven health education standards by attaching content specific topics to the performance descriptions for each standard.

¹ General Laws of Rhode Island, Chapters 16-21 and 35-4 and section 23-1-18(4)

The Role of Health Education

Health education is part of an essential strategy to affect positively the health and education of children. When children are healthy, they can learn; when they are educated, they can stay healthy. Clearly, because education and health go hand-in-hand, an investment in educating our children about becoming and staying healthy leads to positive outcomes. Our children become better learners, and improve the quality of their lives and of the society in which they live. Ultimately, they will work and contribute to society as productive citizens.

However, research indicates that young people today are less healthy than those of recent generations. The Health Education Framework lists some of the statistics (pages 4-5) which call for a concerted response from all those who care for children and youth. For example, nearly half of young people aged 12 - 21 are not vigorously active on a regular basis. The prognosis is increased cardiovascular disease, cancer, and many other chronic conditions. More youth carry weapons than ever before. The result is intentional and unintentional injury, which is now the leading cause of death among 15 to 24 year olds. The Centers for Disease Control and Prevention (CDC) has identified six categories of risk behaviors in today's students: 1) Behaviors that result in unintentional and intentional injuries; 2) Tobacco use; 3) Alcohol and other drug use; 4) Sexual behaviors that result in HIV infection, other STDs, and unintended pregnancy; 5) Dietary patterns that contribute to disease; and 6) Insufficient physical activity. These risk behaviors are preventable!

A comprehensive approach is required to assist students to become motivated to improve and maintain their health, prevent disease and injury and reduce risk. Health education is part of that comprehensive approach. Research tells us that while health knowledge can change with health instruction, a minimum of 40-50 hours of health education is needed in order to impact behaviors. Health education is about *prevention*. A planned and sequential K-12 health education curriculum addresses all dimensions of health in a way that results in students who possess the knowledge and skills to live a healthy life.

² CDC, Physical Activity and Health: A Report of the Surgeon General. 1997.

Health Education Curriculum Development

This document is primarily designed for use by those involved in K-12 comprehensive health education curriculum development at the district and grade level. It is meant to serve as a guideline and resource for those in a school district charged with developing sequential teaching, learning and assessment opportunities for students K – 12.

According to the Rhode Island Health Education Framework, curriculum development

"is more than simply arranging knowledge into manageable chunks. A good curriculum is more than a syllabus; it addresses multiple objectives simultaneously and envisions experiences for student that will provoke their curiosity, spark their imaginations and deepen their understanding [through] inquiry-based, resource-rich teaching and learning." ³

Effective curricula are marked by opportunities for active participation of students in the learning process including student-centered activities such as dialogue, role play, group projects and discussion. Students come to know something not by just acquiring information, but by interpreting and relating it to previously acquired knowledge. The use of a variety of approaches for teaching and learning, such as cooperative learning, mastery learning, peer coaching and other strategies, interfaces with diverse student learning styles.

Four phases have been identified as guide posts for curriculum development and improvement (RI Educational Leadership Academy and the RI Association for Supervision and Curriculum Development, 1988). They are *planning, development, implementation,* and *evaluation*. Each of these phases is presented below, accompanied by a series of questions curriculum developers can ask themselves as they seek to develop or revise their district health education curriculum so that it is aligned with the health education standards and revised outcomes. The questions provide flexibility in approaching the development process as well as a "checklist" for the work at hand. Once the work is underway, curriculum committees may find there are still other questions they need to answer such as "Are we following our plan?" "Is this working?" "Have we planned to review our work periodically?".

5

³Rhode Island Health Education Framework, Health Literacy for All Students. Rhode Island Department of Education, 1996, p. 22.

Phase I: Planning

This, the initial phase of the curriculum development and improvement process, involves (1) establishing a planning process and structure, (2) developing philosophy and goals, and (3) assessing current curricula and the configuration of health education in the district or school. Curriculum developers may want to ask themselves the following questions:

- Who should be at the table to work on this curriculum? Is there K-12 representation here?
- What provision has been made to involve the community in the process?
- · What is currently being taught?
- Who is teaching what and when?
- How much time is available for teaching?
- What is the current scope and sequence of health education?
- What are common themes across grades K 12?
- How is the curriculum currently organized? by theme? by topic? by skills?
- How are current health issues addressed?
- Where are the gaps?
- Where are the linkages with other subject areas?
- To what resources do we have access, including books, data, experts, etc.?
- What are students interested in learning?
- How does the curriculum at each grade level prepare students to meet the standards assessed in the Rhode Island State Health Performance Assessment administered at grades 5 and 9?

Phase II: Development

This, the second phase of the process, involves (1) developing scope and sequence, and (2) selecting teaching, learning and assessment strategies. Questions to consider include the following:

- How should the curriculum be organized: by standards? by risk behaviors? by content or concepts? by skills? by theme?
- How does this curriculum reflect the health education standards and outcomes?
- How is the document teacher friendly?
- To what extent are various methods of student assessment provided?
- How comprehensive is the curriculum?
- What teaching and learning strategies does the curriculum employ?
- How does this curriculum address the needs of diverse learners?
- What resources are available to assist in developing this curriculum?
- Does the curriculum include suggested materials and resources for teachers?
- How does this curriculum reflect community needs? values? mores?

Phase III: Implementation

Implementation represents the process of transforming curriculum plans into actual teaching and learning. Curriculum developers may want to consider:

- What is the plan for implementation?
- What kind of professional development is needed?
- What kind of ongoing peer support is needed during implementation?
- What resources are needed for implementation?
- What community assets are available?
- What kind of administrative support is needed to implement the curriculum most effectively?
- What kind of support materials need to be developed to aid in implementation (e.g. form letters to parents)?
- What is the plan for introducing the curriculum to the community?

Phase III: Evaluation

to:

Evaluation involves developing a mechanism to track the progress of implementing the curriculum and its intended goals. It answers the questions, "Does the curriculum provide a K-12 scope and sequence? Does it provide for a variety of teaching and learning styles? Does it align with Rhode Island's health education framework and assessments? Does it meet the needs of our students and teachers?" In other words, how does this curriculum work? Evaluation involves developing a method and tools to measure whether or not the goals established through the curriculum process and the curriculum itself have been reached. Evaluation also allows the curriculum committee to review the implementation plan to see what worked and what needs to be improved. It provides a process for determining curriculum effectiveness and a mechanism for feedback in order to revise the curriculum in the future.

In creating an evaluation plan for a standards-based curriculum, curriculum developers must decide in the planning phase what they want to know about the curriculum, such as, but not limited

- What are the indicators that your curriculum has been effectively implemented?
- Has it been implemented according to agreed upon specifications?
- How closely is the curriculum aligned with the standards?
- How do the teachers of health education use the curriculum?
- What impact has it had on student knowledge, attitudes, and skills?
- Are our students meeting or exceeding the performance standards set by the Board of Regents?
- How will the curriculum be reviewed and revised?

The evaluation process also addresses the mechanisms for evaluating student performance:

- What kinds of classroom scoring guides are used for each of the seven standards?
- What are the multiple modes of assessment employed?
- What are the rubrics used to assess the quality of student work?
- What provision is used to measure student achievement?

How to Read and Use the Outcomes

The Revised Outcomes are grouped by four grade categories: Kindergarten through Grade 4, Grades 5 through 8, Grades 9 - 10 and Grades 11 - 12. The Outcomes are arranged in table form with each column headed by one of the seven health education standards. The amount of content and skills vary from standard to standard. The standards and outcomes are not independent of one another. None is meant to be considered in isolation. They are complementary. Even a cursory review across a table will show the interrelationships. Curriculum developers need to be aware of those interrelationships as well as the opportunities for interdisciplinary approaches.

A notation is made throughout the document of "**Required Topics**". These are listings of the minimum content required by law. Where **Required**" **Topics**" are not listed separately, the content of the outcome itself establishes the minimum content.

In many cases, these health education outcomes overlap with other health content areas and/or can be linked with other subject areas, such as Science, Mathematics, English Language Arts, Social Studies and Family Life and Consumer Science. This is also indicated at the bottom of each table.

A general instructional goal for the content area at that grade level is presented at the top of the page. In most cases all the outcomes for the entire grade grouping (e.g. K - 4) are on one or two pages. Refer to the diagram on the following page to become familiar with the features and layout.

The Seven Content Areas

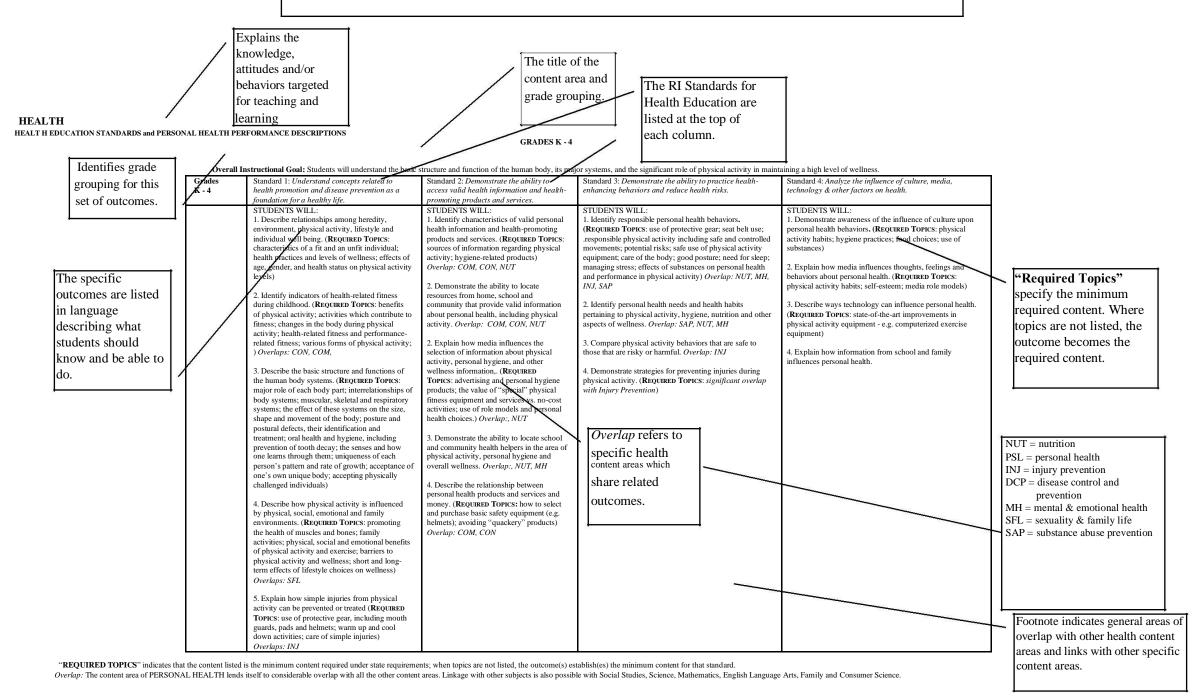

Each of the seven content areas presented in this document encompasses the wide variety of topics inherent to the goal of improving and maintaining health, and preventing disease and injury.

A rationale precedes the health education instructional outcomes for each of these seven content areas.

Seven Content Areas of RI's Health Education Instructional Outcomes

- 1. Personal Health (including Physical Activity and Wellness)
- 2. Mental and Emotional Health
- 3. Injury Prevention
- 4. Nutrition
- 5. Sexuality and Family Life
- 6. Disease Prevention and Control
- 7. Substance Use and Abuse Prevention (including alcohol, tobacco and other drugs, or ATOD)

3. INJURY PREVENTION

HEALTH EDUCATION STANDARDS and INJURY PREVENTION INSTRUCTIONAL OUTCOMES GRADES K - 4

Overall Instructional Goal: Students will understand that injuries are not "accidents", but are predictable and preventable. It is important to recognize, understand and abide by basic rules, regulations, procedures and courtesies and deal with interpersonal conflict in constructive, effective and non-violent ways.

_	Constructive, effective and non-violent ways.		Chandard 21 Charles to will	Chandand 4.	Chandard Fr. Chadards will	Chandand Co. Charles	Ctondord 7. Students
Grades K - 4	Standard 1: Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life.	Standard 2: Students will demonstrate the ability to access valid health information and health-promoting products and services.	Standard 3: Students will demonstrate the ability to practice health-enhancing behaviors and reduce health risks.	Standard 4: Students will analyze the influence of culture, media, technology & other factors on health.	Standard 5: Students will demonstrate the ability to use interpersonal communication skills to enhance health.	Standard 6: Students will demonstrate the ability to use goal setting & decision making skills to enhance health.	Standard 7: Students will demonstrate the ability to advocate for personal, family, community & environmental health.
STUDENTS							
	1.1. describe relationships between the causes and effects of injuries, including personal behaviors and injury prevention. (REQUIRED TOPICS: concept of prevention; need for basic safety rules in the home, at school and at play; pedestrian and traffic safety; bus safety; use of protective gear; auto safety, including use of car seats and safety belts; railroad safety) 1.1. describe the effect of injuries on the body. (REQUIRED TOPICS: "accidents" implies not under our control vs. injuries as predictable and preventable; burns; poisoning; falls; unintentional weapon injury; sports injuries; water/boating injuries; biking; injuries related to occupation) 1.4. describe how physical, social, emotional and family environments influence personal safety. (REQUIRED TOPICS: importance of listening to parents, safety personnel; paying attention to surroundings; potentially hazardous situations at home, school & play; safe vs. dangerous places to play; avoiding settings with risk for assault; access to tools, poisons, drugs, weapons; risk taking; school and home fire safety; water safety; playground equipment use and maintenance.) Overlap: PSL 1.5. identify common injuries of children and their prevention. (REQUIRED TOPICS: pedestrian safety; auto safety, bicycle safety; residential safety; fire safety; water/boating safety; firearms; fighting; identifying situations that threaten safety and may result in neglect or abuse) Overlap: SFL	2.4. demonstrate the ability to locate resources from home, school and community that provide help for injured individuals (REQUIRED TOPICS: who should provide care; responding to an emergency; using 911) 2.5. describe the relationship between injury prevention products and money. (REQUIRED TOPICS: first aid products; home first aid kits; products promoting safetychild-proof caps, air bags in autos; crumbling glass; shatter-proof windshields; smoke detectors; fire extinguishers; importance of maintenance of bicycles, skateboards, motorcycles, etc.) 2.6. identify injuries requiring professional health services. (REQUIRED TOPICS: getting an adult to help when injury occurs; simple vs. serious injury care; using 911; reporting an injury; reporting abuse) 2.7. identify different kinds of health providers who can provide information about injury prevention and can provide emergency services. (REQUIRED TOPICS: trusted adults; health helpers; other community helpers - e.g. police, firefighters, EMTs) Overlap:, DCP	3.1. identify responsible injury prevention and treatment behaviors (REQUIRED TOPICS: use of protective gear; seat belt use; avoiding dangerous objects such as needles, weapons, fire; treatment for cuts, scrapes, bruises, burns, falls; "no-go-tell" strategies; disaster preparedness) Overlap: SFL 3.2. identify need for personal safety and own injury prevention habits. (REQUIRED TOPICS: use of protective sports and play gear, seat belt use; use of medicines) Overlap: SAP 3.3. compare behaviors that are safe to those that are risky or harmful. (REQUIRED TOPICS: avoiding dangerous objects—guns, knives, needles, injured animals; abiding by safety rules) 3.4. use strategies for preventing injuries. REQUIRED TOPICS: use of bike helmets, seatbelts, avoiding dangerous items, places; abiding by safety rules e.g. bus) 3.5. develop injury prevention and management strategies for personal health. (REQUIRED TOPICS: reducing or eliminating the potential for injury in the home, school and play environment; fire safety; locking up dangerous substances and items in the home; infant/child issues)	4.2. explain how media influences thoughts, feelings and behaviors about injury prevention. (REQUIRED TOPICS: safety equipment use; violence as a means to resolve conflict and/or express feelings) 4.3. describe ways technology can influence injury prevention. (REQUIRED TOPICS: state-of-the-art improvements in safety equipment - e.g. auto safety belts) 4.4. explain how information from peers, school and family influences injury prevention behaviors.	5.3. demonstrate healthy ways to express needs, wants, and feelings. (REQUIRED TOPICS: conflict and communication in relationships with family members, friends) Overlap: MH 5.7. differentiate between negative and positive responses to conflict situations. (REQUIRED TOPICS: what is conflict; verbal and physical fighting; use of weapons to resolve conflict) 5.8. understand and demonstrate non-violent strategies to resolve conflicts.	6.1. apply a decision-making process to an injury prevention issue. (REQUIRED TOPICS: decision-making models. e.g. identifying/defining problem; alternative solution, predicting consequences, choosing course of action, evaluating outcome.) 6.2. explain when it is appropriate to ask for assistance in preventing or treating injuries, including abuse or assault. 6.3. predict outcomes of specific decisions.	7.1. discuss accurate information and express opinions about injury prevention issues. 7.2. describe a variety of methods that convey accurate information and ideas about preventing and treating injuries. 7.3. identify community agencies that advocate for prevention of injuries. 7.4. influence and support others in making choices about avoiding risks with potential for injuries. (REQUIRED TOPICS: peer support for prevention of injuries) 7.5. work cooperatively when advocating for injury prevention.

"REQUIRED TOPICS" indicates that the content listed is the minimum amount required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

Overlap: The content area of INJURY PREVENTION lends itself to considerable overlap with other health content areas, namely: PERSONAL HEALTH (PSL), MENTAL AND EMOTIONAL HEALTH (MH), SEXUALITY AND FAMILY LIFE (SFL).

Linkages with Social Studies, Science, Mathematics, English Language Arts, Family Life & Consumer Science are also possible.

HEALTH EDUCATION STANDARDS and INJURY PREVENTION INSTRUCTIONAL OUTCOMES GRADES 5 - 8

Overall Instructional Goals Grades 5 - 8: Students will understand that injuries are not "accidents", but are predictable and preventable. It is important to recognize, understand and abide by basic rules, regulations, procedures and courtesies and deal with interpersonal conflict in constructive, effective and non-violent ways.

Grades 5 - 8	Standard 1: Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life.	Standard 2: Students will demonstrate the ability to access valid health information and health-promoting products and services.	Standard 3: Students will demonstrate the ability to practice health-enhancing behaviors and reduce health risks.	Standard 4: Students will analyze the influence of culture, media, technology & other factors on health.	Standard 5: Students will demonstrate the ability to use interpersonal communication skills to enhance health.	Standard 6: Students will demonstrate the ability to use goal setting & decision making skills to enhance health.	Standard 7: Students will demonstrate the ability to advocate for personal, family, community & environmental health.
STUDE	NTS WILL DEMONSTRATE THE ABILT	TY TO:					
	1.1. explain the relationship between positive health behaviors and the prevention of injury and premature death. (REQUIRED TOPICS: concept of intentional and unintentional injuries; magnitude of the injury problem among various age groups; predictability of injuries) 1.4b. analyze how environment and personal safety are interrelated. (REQUIRED TOPICS: weather, electrocution, fire, poison, firearms and other weapons) 1.3. explain the effects of injuries on the body, and the significance of disabling injuries (REQUIRED TOPICS: various injuries - breaks, strains, sprains; head and spinal cord injury; weight-lifting injuries) 1.5. describe ways to reduce risks related to injuries among adolescents. (REQUIRED TOPICS: use of safety equipment; signs & symptoms of child abuse; dating abuse) Overlaps: MH, SFL 1.6. describe how appropriate treatment can prevent premature death and disability related to injuries. (REQUIRED TOPICS: when to seek medical care; basic first aid; treating seizures, hypothermia, heat stroke, heat exhaustion; Heimlich maneuver; basic CPR and AED awareness) Overlaps: PSL, DCP, SFL	2.1. analyze the validity of injury prevention and treatment information. (REQUIRED TOPICS: sources of information) 2.4. locate injury prevention and treatment products and services (REQUIRED TOPICS: sources of products and services) 2.5. compare the costs and validity of injury prevention and treatment products. (REQUIRED TOPICS: quackery; consumerism) 2.6. describe situations requiring professional health services (REQUIRED TOPICS: reporting child abuse; when to call for medical help: traffic related injuries; falls resulting in head injury; substance use; burns; water/boating injuries; sports injuries; weapons; poison.) 2.7. explain roles played by different health providers in promoting safety and preventing injuries. (REQUIRED TOPICS: role of public safety officers/police, fire; EMT/rescue workers, etc.)	3.1. explain the importance of assuming responsibility for behaviors. (REQUIRED TOPICS: safety laws and rules for home, play areas, school; impact of injury on the family, the individual and society) 3.2. analyze personal risk taking behaviors which could lead to injury. (REQUIRED TOPICS: recreational, leisure, home, occupational) 3.3. distinguish between safe and risky or harmful behaviors. (REQUIRED TOPICS: identifying personal lifestyle and environmental risks; recreational risks; eliminating hazards) 3.4. use injury prevention strategies to improve or maintain personal and family health. (REQUIRED TOPICS: use of safety equipment - helmets, pads, reflective gear, railroad safety; influence of alcohol, drugs on behavior, reason & judgment) Overlaps: MH, SA, PSL 3.5 develop injury prevention and management strategies for personal, family and community health. (REQUIRED TOPIC: home safety programs; motor-vehicle safety; emergency preparedness; confronting a life-threatening situation; role of legislation, regulation and enforcement; environmental change - e.g. pool fencing, sidewalks; product modification; education)	4.1. describe the influence of cultural and family beliefs on injury prevention behaviors. (REQUIRED TOPICS: family and community injury prevention practices.) 4.2. analyze how positive and negative messages from media and other resources influence intentional and unintentional injury prevention (REQUIRED TOPICS: role models using safety equipment TV & movie violence) 4.3. analyze the influence of technology on personal and family injury prevention behaviors (REQUIRED TOPICS: advances in the quality of safety equipment and devices; the Internet as a source of safety information) 4.4. analyze how information from peers influences and affects health choices about preventing injuries.	Note: these descriptors mirror those under Standard 5 for Mental and Emotional Health because of the essential connection between communication and the prevention of violence. 5.1. use effective verbal and non-verbal communication skills to enhance prevention of injury. (REQUIRED TOPICS: listening skills; assertiveness; "I" statements; how problem-solving required communication skills). 5.2. describe how the behaviors of family and peers affect interpersonal relationships. (REQUIRED TOPICS: influence of self-perception on interactions with others; abuse; neglect; using violence to express emotions and resolve conflict; effect on choices.) 5.3. express needs, wants and feelings in a healthy way. 5.4. communicate care, consideration and respect of self and others. 5.5. use communication skills needed to build and maintain healthy, violence-free relationships. (REQUIRED TOPICS: rules for working cooperatively; appropriately levels of sharing in various relationships; qualities of a good friend.) 5.6. use refusal and negotiation skills needed to prevent injury Overlaps: SFL, MH	6.3. predict how decisions regarding risk-taking behaviors have consequences for self and others. (REQUIRED TOPICS: cause and effect/risks and consequences; effect of injuries on self, family and others)	7.4. influence and support others in making positive choices affecting safety and preventing injury. 7.5. work cooperatively wher advocating for individual, family and school safety.

[&]quot;REQUIRED TOPICS" indicates that the content listed is the minimum amount required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

Overlap: The content area of INJURY PREVENTION lends itself to considerable le overlap with other health content areas, namely: PERSONAL HEALTH (PSL), MENTAL AND EMOTIONAL HEALTH (MH), SEXUALITY AND FAMILY LIFE (SFL).

Linkages with Social Studies, Science, Mathematics, English Language Arts, Family Life & Consumer Science are also possible.

HEALTH EDUCATION STANDARDS and INJURY PREVENTION INSTRUCTIONAL OUTCOMES GRADES 9 - 10

Overall Instructional Goals Grades 9 - 10: Students will understand that injuries are not "accidents", but are predictable and preventable. It is important to understand the relationship between personal risk-taking and injuries and the relationship of individual behaviors and their impact on others. Students will also recognize, understand and abide by basic rules, regulations, procedures and courtesies and deal with interpersonal conflict in constructive, effective and non-violent ways.

9 - 10	concepts related to health promotion and disease prevention as a foundation for a healthy life.	will demonstrate the ability to access valid health information and health-promoting products and services.	demonstrate the ability to practice health-enhancing behaviors and reduce health risks.	analyze the influence of culture, media, technology & other factors on health.	the ability to use interpersonal communication skills to enhance health.	demonstrate the ability to use goal setting & decision making skills to enhance health.	demonstrate the ability to advocate for personal, family, community & environmental health.
STUDE	ITS WILL DEMONSTRATE THE ABI	LITY TO:					
	1.1. analyze how behavior can impact personal safety. (REQUIRED TOPICS: magnitude of the injury problem among various age groups; predictability of injuries; interpretation of data relating to incidence and prevalence of various injuries) 1.3. analyze the impact of risk-taking behaviors and the occurrence of injuries on the functioning of body systems, and the significance of disabling injuries (REQUIRED TOPICS: physical, mental, emotional, social implications of injury; various injuries - e.g. breaks, strains, sprains; burns; falls; motor-vehicle related risks; head and spinal cord injury) 1.4. analyze how the family, peers, community and environment influence the health of individuals. (REQUIRED TOPICS: the consequences of participating in high-risk behaviors)	2.4. access school and community health services for self and others. 2.6. analyze situations requiring professional health services (REQUIRED TOPICS: reporting child abuse; when to call for medical help: traffic related injuries; falls resulting in head injury; substance use; burns; water/boating injuries; sports injuries; weapons; poison.) 2.7. explain requirements for entering and pursuing specific health careers related to safety: (REQUIRED TOPICS: public safety officer, EMT, nurse, physician, educator, policy maker)	3.1. analyze the role of individual responsibility for preventing injuries. (REQUIRED TOPICS: choices and consequences; effects of drugs/alcohol on behavior, reason and judgment) 3.2. evaluate personal risk-taking behaviors to determine strategies for health enhancement and risk reduction (REQUIRED TOPICS: use of safety equipment in recreational, sport or leisure activities; avoiding dangerous situations; occupational injuries, e.g. falls, lifting, repetitive movement; sharp objects, occupational choice; avoiding abusive relationships.) 3.5. develop injury prevention and management strategies for personal, family and community health. 3.6. identify and demonstrate ways to avoid and reduce threatening situations.	4.4. analyze how information from the community influences injury prevention behaviors. (REQUIRED TOPICS: local, state and federal rules, regulations and law regarding safety and prevention of injury)	5.1. use effective communication skills with family, peers and others. (REQUIRED TOPICS: assertive behavior; listening skills; "befriending" skills) Overlaps: SFL, MH 5.2. analyze how interpersonal communication affects relationships. (REQUIRED TOPICS: conflict resolution) Overlaps: SFL, MH 5.3. use healthy ways to express needs, wants and feelings, without using violence. 5.4. use ways to communicate care, consideration and respect of self and others. (REQUIRED TOPICS: knowledge of and respectful for the diversity of others) 5.5. apply strategies for solving interpersonal conflicts without harming self or others. Overlaps: SFL, MH 5.6. apply refusal, negotiation and collaboration skills needed to avoid potentially harmful situations. Overlap: MH 5.7. analyze the possible causes of conflict in schools, families and communities leading to injury. 5.8. use healthy strategies to prevent intentional injury	6.1. analyze the ability to use different strategies when making decisions related to injury prevention. (REQUIRED TOPICS: identifying personal, family and community safety plans) 6.2. analyze safety concerns that require individuals to work together. (REQUIRED TOPICS: community safety efforts; occupational risks) Overlap: NUT 6.3. predict immediate and long-term impact of risk-taking decisions on the individual, family and community. (REQUIRED TOPICS: factors and steps in decision-making; on-going nature of decision making throughout life. 6.5. compare and contrast a variety of plans that address personal strengths, needs and risks for injury. (REQUIRED TOPICS: setting personal goals; self-contracts; calculating risks; avoiding assault)	7.1. discuss accurate information and express opinions about safety and prevention of injuries. 7.2. design methods for accurately expressing information and ideas about safety and injury prevention. 7.4. influence and support others in making choices about safety and injury prevention. (REQUIRED TOPICS: avoiding injury; seeking professional help/treatment; avoiding violence) Overlaps: PSL, NUT, DCP) 7.5. work cooperatively when advocating for safe, healthy communities. (REQUIRED TOPICS: laws to address safety; identifying community resources.)

[&]quot;REQUIRED TOPICS" indicates that the content listed is the minimum amount required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

_Overlap: The content area of INJURY PREVENTION lends itself to considerable le overlap with other health content areas, namely: PERSONAL HEALTH (PSL), MENTAL AND EMOTIONAL HEALTH (MH), SEXUALITY AND FAMILY LIFE (SFL).

Linkages with Social Studies, Science, Mathematics, English Language Arts, Family Life & Consumer Science are also possible.

HEALTH EDUCATION STANDARDS and INJURY PREVENTION INSTRUCTIONAL OUTCOMES GRADES 11 - 12

Overall Instructional Goals Grades 11 -12: Students will understand that injuries are not "accidents", but are predictable and preventable. It is important to understand the relationship between personal risk-taking and injuries and the relationship of individual behaviors and their impact on others. Students will also recognize, understand and abide by basic rules, regulations, procedures and courtesies and deal with interpersonal conflict in constructive, effective and non-violent ways.

Grades 11- 12 STUDENTS	Standard 1: Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life. WILL DEMONSTRATE THE ABILITY TO:	Standard 2: Students will demonstrate the ability to access valid health information and health-promoting products and services. STUDENTS	WILL DEMONSTRATE THE ABILITY	TO:					
STUDENTS	1.1. describe relationships between proper nutrition and individual well being on a daily basis and throughout the life span. (REQUIRED TOPICS: food as fuel, sensory and functional characteristics of food, various needs throughout lifespan, variety and moderation. 1.2. identify indicators of good nutrition during childhood. (REQUIRED TOPICS: food pyramid, major nutrients, impact of proper nutrition on health and personal wellness) 1.3. describe how the body digests and uses food. (REQUIRED TOPICS: anatomy of digestive system, plant and animal sources of foods) 1.5. identify common childhood problems related to poor nutrition (REQUIRED TOPICS: dental health, energy levels, foods and nonfoods) 1.7. explain how childhood injuries and illnesses related to food storage and preparation can be prevented or treated. (REQUIRED TOPICS: food storage, food sources, food chain, from farm to table, food preparation; food allergies)	2.1. identify characteristics of valid nutrition information and good nutrition promoting products and services. (REQUIRED TOPICS: identifying health helpers e.g. persons, books) 2.2. locate resources from home, school and community that provide valid health information about nutrition. 2.4. locate school and community nutrition helpers. (REQUIRED TOPICS: identifying health helpers) 2.5. compare cost and nutritional value of various foods. 2.6. identify situations requiring professional health services for nutrition. (REQUIRED TOPICS: e.g. special diets for diabetes, food safety) 2.7. identify different kinds of health providers who can provide information and services about nutrition (REQUIRED TOPICS: e.g. dentists, dental hygienists, physicians, nurses, FNPs, PAs, nutritionists, dietitians)	3.1. identify responsible nutrition behaviors. (REQUIRED TOPICS: importance of beginning healthy diet at young age) 3.2. identify personal nutritional needs and nutrition habits. 3.3. compare eating behaviors that are safe to those that are risky or harmful. (REQUIRED TOPICS: safe snack preparation; what things are edible) 3.4. demonstrate strategies to improve or maintain nutrition behaviors which enhance health. (REQUIRED TOPICS: dental health; exercise) 3.5. develop injury prevention and management strategies for personal health. (REQUIRED TOPICS: safe food preparation)	4.1. discuss the influence of culture upon nutrition behaviors, such as food choice and food preparation. 4.2. explain how media influences thoughts, feeling and behaviors about nutrition. 4.2. explain how media influences selection of foods, information about nutrition, food and nutrition products and services. (REQUIRED TOPICS: relationship of money and nutrition; advertisements and food selection) 4.3. describe ways technology influences nutrition. 4.4. explain how information from school, family and society influences nutrition.	5.3. use healthy ways to express nutritional wants, needs and feelings.5.3. choose healthy foods in a social context.	6.1. apply a decision-making process to a nutritional issue. <i>Overlap: MH</i> 6.2. explain when it is appropriate to ask for assistance in making a nutrition-related decision and setting healthy eating goals. (REQUIRED TOPICS : food guide pyramid and own eating patterns) 6.3. predict outcomes of specific nutrition decisions. 6.4. set a personal nutritional goal and track progress towards its achievement.	7.1. discuss accurate information and express opinions about nutrition issues. 7.2. describe a variety of methods that convey accurate information and ideas about nutrition. 7.3. identify community agencies that advocate for good nutrition. 7.4. influence and support others in making positive nutritional choices. 7.5. work cooperatively when advocating for good nutrition.

[&]quot;REQUIRED TOPICS" indicates that the content listed is the minimum content required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard. Overlap: The content area of NUTRITION lends itself to considerable overlap with PERSONAL HEALTH, DISEASE CONTROL AND PREVENTION and MEN TAL HEALTH.

Linkages with Social Studies, Science, Mathematics, English Language Arts, Family Life and Consumer Science are also possible.

HEALTH EDUCATION STANDARDS and NUTRITION EDUCATION INSTRUCTIONAL OUTCOMES GRADES 5 - 8

Overall Instructional Goal: Students will understand the role of proper nutrition in the attainment and maintenance of health and the relationship between nutrition and physical and mental performance.

	emotional, social and physical health which males and females experience during puberty and adolescence. (REQUIRED TOPICS: how body image affects feelings and behaviors; feelings about body changes; role of heredity, environment and health habits in personal appearance; development of sexual and romantic feelings in many people during puberty; gender roles and gender role stereotyping; how talents, characteristics, strengths and hopes are equally found in boys and girls; sexual health including its enhancement of life and relationships; people as sexual beings with a sexual identity; definition of masturbation; definition of sexual orientation, gender identity/expression; theories which explain sexual orientation, gender identity/expression, coming out, homophobia; value of non-sexual relationships; characteristics of good friends; dating; types of dating; family views regarding dating; difference between like, infatuation and love.) 1.3. explain how reproductive health is influenced by the interaction of body systems. (REQUIRED TOPICS: the components of the male and female reproductive systems; the role these structures have in reproduction (testes, urethra, penis, accessory glands, uterus, ovaries, fallopian tubes, vagina, etc.); role of endocrine system; secondary sex characteristics; range of puberty; menstruation; nocturnal emissions; pregnancy; possibility of pregnancy with genital intercourse; fertilization, prenatal development and human birth; role of X and Y chromosomes in determining baby's gender)	appropriate resources for teens to answer questions or concerns about puberty and growing up, and family/ relationship issues; sexuality issues such as sexual activity, sexual orientation, gender identity/expression etc. 2.6. describe situations requiring professional services. (REQUIRED TOPICS: pregnancy, assistance with issues surrounding dating violence, rape, sexual abuse, etc.) 2.7. explain the role of health care providers (e.g. physicians, nurses, etc.) in puberty, maturing, contraceptive decision making and other reproductive health, sexuality and family life issues 2.7. identify trusted adults professional health care providers, faith communities and other resources available for someone with questions about sexuality and growing up.	of assuming responsibility for personal health behaviors related to puberty and reproductive health (REQUIRED TOPICS: ways for males and females to maintain healthy habits during puberty; good health behaviors for a woman who is pregnant.) 3.2. analyze personal health habits to determine health strengths and risks. (REQUIRED TOPICS: ways people can be proud of their special qualities; impact of body image on emotions and behaviors; assuming responsibility for personal behaviors, including sexual behaviors.) CONTINUED	different cultural and religious beliefs in the US on health behaviors and practices. (REQUIRED TOPICS: marriage, divorce, relationships, parenthood; factors which have significantly influenced family patterns through time; health behaviors and utilization of health services regarding sexual and reproductive health; use of contraception; prenatal care) 4.2. analyze why individuals need to examine positive and negative messages received from media, culture and peers. (REQUIRED TOPICS: decision-making about sexual health; peer influence on health choices; establishing guidelines for one's own sexual behavior; influence of media, peers and community on one's understanding of healthy relationships; similarities and differences in male and female gender roles; masculinity, femininity, choices and opportunities for males and females; unrealistic or negative images presented in gender role stereotyping) CONTINUED	communication skills to enhance health. (REQUIRED TOPICS: Explains that personal choices of expression should be respected for all individuals; ways for preteenagers and teens to talk with their parents, other trusted adults and significant others about questions or concerns regarding sexuality issues) 5.2. describe how the behavior of family and peers affects interpersonal communication. 5.3. use healthy ways to express needs, wants and feelings. 5.4. communicate care, consideration and respect of self and others. (REQUIRED TOPICS: importance of respecting different value systems in friends and families; respect of others regardless of personal choice of expression) 5.5. use communication skills for dealing with sexual pressure from peers and from one's girlfriend/boyfriend (REQUIRED TOPICS: pressure to date and/or be sexually active; saying no and communicating limits, etc.)	strategies when making decisions regarding puberty and sexual health (REQUIRED TOPICS: abstinence from sexual intercourse; responsible contraceptive use; steps involved in sexual decision-making; role of parents and trusted adults). 6.2. analyze how decisions relating to puberty and sexual health are influenced by individuals, family and/or community values. (REQUIRED TOPICS: how parents and other trusted adults can help children with decisions regarding puberty and their personal health; role of self-esteems personal goals, family values in responsible sexual decision —making; responsibilities in family change as individuals mature; changes in family structure and influence on relationships.) CONTINUED	information about sexual health issues. (REQUIRED TOPICS: heterosexual, and bisexual people are alike except for their sexual attraction; immediate and long-term impacts of adolescent pregnancy on the individual, family and community.) 7.4. to influence and support others in making positive personal health choices about family issues, relationships, sexuality and growing up. (REQUIRED TOPICS: how people and communities can help homosexual and bisexual people who are often mistreated, called hurtful names, or denied their rights because of their sexual orientation, gender identity/expression)

[&]quot;REQUIRED TOPICS" indicates that the content listed is the minimum content required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

HEALTH EDUCATION STANDARDS and SEXUALITY AND FAMILY LIFE INSTRUCTIONAL OUTCOMES GRADES 5-8 (Continued)

Overall Instructional Goal. To develop an understanding of the emotional and physical issues related to families, the beginning of life, birth, friendship, puberty, adolescence and growing up.

Grades 5-8	Standard 1: Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life.	Standard 2: Students will demonstrate the ability to access valid health information and health-promoting products and services.	Standard 3: Students will demonstrate the ability to practice health-enhancing behaviors and reduce health risks	Standard 4: Students will analyze the influence of culture, media, technology and other factors on health.	Standard 5: Students will demonstrate the ability to use interpersonal communication skills to enhance health.	Standard 6: Students will Demonstrate the ability to use goal setting and decision making skills to enhance health.	Standard 7: Students will demonstrate the ability to advocate for personal, family, community and environmental health.
STUDEN	1.4a. describe how family, peers and environment influence the health of adolescents. (REQUIRED TOPICS: families in present-day society; patterns in US; separation, divorce and how children deal with their feelings about it; responsibilities and privileges inherent in family; responsible parenting; seriousness and long-term nature of having and/or raising a child; why some people choose not to have children.) 1.5. describes ways to reduce risks related to sexual health (REQUIRED TOPICS: abstinence from sexual intercourse as the acceptable form of sexual expression for preteenagers and adolescents; need for adolescents to set limits regarding sexual expression. 1.6. explain how appropriate health care can enhance health (REQUIRED TOPICS: contraception as a means to prevent pregnancy; methods; advantages and disadvantages, etc.; choices when a woman is faced with an unintended pregnancy - e.g. raise the child, adoption, abortion; the crime of rape as forced intimate sexual conduct)		3.1. explain the value of young people postponing sexual activity (e.g. reducing consequences associated with early onset of sexual activity). 3.3. distinguish between safe and risky or harmful behaviors. (REQUIRED TOPICS: abstinence from sexual intercourse is the best way to prevent pregnancy; social, emotional, economic and physical risks of adolescent pregnancy and parenthood for both males and females; there are many kinds of relationships based on love and like but no one should expect you to do anything sexual as an outcome of the relationship) 3.4. apply strategies to improve or maintain personal and family relationships. 3.6. identify and use ways to reduce and/or avoid threatening situations including sexual abuse and sexual assault	4.2. analyze the influence of media on sexual health behaviors (REQUIRED TOPICS: gender roles; body image; use of contraceptives, etc.) 4.3. analyze the influence of technology on sexual health behaviors (REQUIRED TOPICS: genetics; alternative fertilization methods; reproductive technology) 4.4. analyze how information from the community influences behaviors regarding sexual and reproductive health.		6.3. predict how decisions regarding sexual behaviors have consequences for self and others. (REQUIRED TOPICS: couples have choices regarding sharing sexual feelings with each other.) 6.4. identify how people can help protect themselves against the possibility of rape (REQUIRED TOPICS: self defense, assessing situations, avoiding drugs and alcohol, etc.) Overlap: INJ	7.3. identify barriers to effective communication of information, ideas, feelings and opinions about sexuality, family and relationship issues. (REQUIRED TOPICS: various methods for people to access help with personal questions or concerns about sexuality or relationships)

[&]quot;REQUIRED TOPICS" indicates that the content listed is the minimum content required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

Overlap: The content area of SEXUALITY AND FAMILY LIFE lends itself to considerable overlap with all the other health content areas. Linkages with Social Studies, Science, English Language Arts, Family Life and Consumer Science are also possible.

HEALTH EDUCATION STANDARDS and SEXUALITY AND FAMILY LIFE INSTRUCTIONAL OUTCOMES GRADES 9-10

Overall Instructional Goal: Students will gain an understanding of those elements inherent in healthy sexual development and maturation including: family communication, relationships, sexual identity, human sexual response cycle, and sexual decision making

Grades	Standard 1: Students will understand concepts	Standard 2: Students will	Standard 3: Students will demonstrate the	Standard 4:	Standard 5: Students will	Standard 6: Students will	Standard 7: Student
9-10	related to health promotion and disease prevention as a foundation for a healthy life.	demonstrate the ability to access valid health information and health-promoting products and services.	ability to practice health-enhancing behaviors and reduce health risks.	Students will analyze the influence of culture, media, technology and other factors on health.	demonstrate the ability to use interpersonal communication skills to enhance health.	demonstrate the ability to use goal setting and	will demonstrate the ability to advocate for personal, family, community and environmental health.
TUDENT	S WILL DEMONSTRATE THE ABILITY TO:						
	1.1. analyze how behavior can impact reproductive health maintenance. (REQUIRED TOPICS: need for contraception during intercourse unless pregnancy is planned; advantages and disadvantages of various methods of contraception; fetal development; childbirth; role of mother, father, coach during labor and delivery; definition of legal abortion) 1.2. describe the interrelationships of mental, emotional, social and physical health throughout young adulthood. (REQUIRED TOPICS: function of sexual and reproductive anatomy; facts vs. myths; human sexual response cycle; sexual feelings and desires throughout life; role of hormones in growth and development and reproductive and sexual functioning; people with disabilities have sexual feelings, needs and desires; dating readiness and interest varies among individuals; sexual expression as an important component of individual's sexual identity; homosexuality, heterosexuality, bisexuality and implications for sexual health, sexual activity, gender roles, etc.) 1.3. analyze the impact of adolescent sexual health behaviors on the individual, families, the community and society. (REQUIRED TOPICS: adolescent pregnancy; STDs; sexual harassment and sexual assault, relationship between sexual behaviors and sexual violence.) 1.4. analyze how the family, peers, community, and environment influence the health of individuals. (REQUIRED TOPICS: various reasons people date, such as companionship, to share an experience with someone, friendship and love.; expression of feelings, including love, is a matter of choice and should not go against personal values; parental concerns; compromising feelings; types of families; factors affecting family functioning (e.g. mobility, divorce, death); interaction of heredity, the environment	2.1. evaluate the validity of health information products and resources. 2.2. analyze appropriate resources from home, school, community which can assist an individual and/or couple with issues such as sexuality, family life, feelings and/or relationships (REQUIRED TOPICS: sexual health and sexual identity/orientation; sexual activity, gender role stereotyping; sexual assault and harassment; finding helpful adults such as parents, teachers, guidance counselors, physicians, mental health counselors, religious leaders, gay/lesbian community resources). 2.4. access school and community resources for self and others. (REQUIRED TOPICS: adolescents with an unplanned pregnancy should talk with their parents, religious leaders, health care providers, and/or other trusted adults.) 2.6. analyze situation requiring professional services for teens. (REQUIRED TOPICS: using health professionals (e.g. gynecologist, community agencies, etc.); dealing with	3.1. analyze the role of individual responsibility for enhancing health (REQUIRED TOPICS: abstinence from sexual intercourse is the preferred sexual behavior for adolescents; responsible behaviors such as contraceptive use; condom use, etc.) 3.2. explain why it is important to talk with one's partner /other trusted adults about contraception prior to deciding to use it. 3.3. analyze the short-term and long-term consequences of safe, risky and harmful behaviors. (REQUIRED TOPICS: sexual intercourse not a way to achieve adulthood; various ways to express affection within a relationship including adolescent dating relationships; factors having an adverse effect on fetal and infant health; methods which promote fetal and infant health; methods which promote fetal and infant health (e.g. mother avoiding ATOD during pregnancy, prenatal care; proper nutrition; parental responsibility, etc.) 3.4. use strategies that improve or maintain sexual health. (REQUIRED TOPICS: importance for adolescents and adults to maintain the health of their reproductive and sexual organs (e.g. pelvic exam, BST, TSE, etc.) 3.5. develop strategies for preventing injury to self and others. (REQUIRED TOPICS: inappropriate expectations and/or behaviors in a relationship; appropriate sexual behaviors for adolescents; coercion and emotional pressure not acceptable in a sexual relationship)	4.1. analyze how cultural diversity may enrich or challenge health behaviors. (REQUIRED TOPICS: why in some cultures some assertive behaviors are considered impolite or inappropriate; beliefs about abortion and contraception are based on religious, cultural, family and societal values;) 4.2. evaluate the effect of media, technology and other factors on Relationships, sexuality, and other aspects of personal and community health (REQUIRED TOPICS: media portrayal of sexuality; realistic and unrealistic images of adolescent and adult relationships; role of emotions, peers, gender roles, culture, personal choice, etc. on motivations for	5.1. demonstrate skills for communicating effectively with the family, peers and others REQUIRED TOPICS: verbal and non-verbal assertiveness techniques; individuals' right to say how they feel even if others disagree, to refuse a request, and to expect to be treated fairly and not be intimidated regarding sexuality issues) 5.2. analyze how interpersonal communication affects relationships. (REQUIRED TOPICS: value of communication; outcomes of poor communication – confusing messages, unwanted behaviors and emotional stress) 5.4. communicate care, consideration and respect of self and others. 5.5. use strategies that solve interpersonal conflicts without harming self or others (REQUIRED TOPICS: being assertive in sexual situations may be difficult and help from parents or trusted adults may be beneficial) 5.6. use strategies that enhance relationships and avoid potentially harmful situations. (REQUIRED TOPICS: negotiation and collaboration skills; refusing pressure from another person to engage in	6.1. use multiple strategies when making decisions related to sexuality and family life issues. (REQUIRED TOPICS: complexity and difficulty of decisions regarding sexual and reproductive health issues such as sexual identity, coming out, abortion, teen pregnancy; dating relationships) 6.3. predict immediate and long term impact of health decisions about sexual health on the individual, family and community. (REQUIRED TOPICS: benefits of postponing childbearing.) 6.4. describe how sexual decision-making for adolescents and adults is influenced by changes in information, abilities, priorities, responsibility. (REQUIRED TOPICS: role of significant others, culture, media, peers.) 6.5. compare and contrast a variety of plans for individuals and couples to evaluate their sexual expression taking into consideration personal strengths, needs and	7.3. utilize strategies to overcome barriers when communicating information, ideas, feelings and opinions about sexual health issues such as contraception, abortion, sexual expression (regardless of sexual orientation, gender identity/expression) 7.4. influence and support others wher making positive heal choices regarding sexuality issues (regardless of sexual orientation, gender identity/expression.) 7.5. work cooperatively when advocating for ways that schools, families, and communities can reduce the incidence of sexual harassment.

[&]quot;REQUIRED TOPICS" indicates that the content listed is the minimum content required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

Overlap: The content area of SEXUALITY AND FAMILY LIFE lends itself to considerable overlap with all the other health content areas. Linkages with Social Studies, Science, English Language Arts, Family Life and Consumer Science are also possible.

HEALTH EDUCATION STANDARDS and SEXUALITY AND FAMILY LIFE INSTRUCTIONAL OUTCOMES **GRADES 11 - 12**

Overall Instructional Goal: Students will gain an understanding of the importance of human sexuality and that healthy sexuality throughout one's life is dependent on respect and understanding of self, families, sexual growth and development, sexual identity and interpersonal relationships.

Grades 11-12	Standard 1: Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life. S WILL DEMONSTRATE THE ABILITY TO:	Standard 2: Students will demonstrate the ability to access valid health information and health-promoting products and services.	Standard 3: Students will demonstrate the ability to practice health- enhancing behaviors and reduce health risks.	Standard 4: Students will analyze the influence of culture, media, technology and other factors on health.	Standard 5: Students will demonstrate the ability to use interpersonal communication skills to enhance health.	Standard 6: Students will demonstrate the ability to use goal setting and decision making skills to enhance health.	Standard 7: Students will demonstrate the ability to advocate for personal, family, community and environmental health.
	1.1. analyze the interrelationships of mental,	2.1. evaluate resources	3.1. evaluate the effect of	4.1. research a school or	5.1. evaluate the	6.1. evaluate	7.1. discuss accurate information and
	emotional, social and physical health throughout life. (REQUIRED TOPICS: multifaceted nature of human sexuality with biological, social, psychological, ethical and cultural dimensions; human sexuality throughout the lifespan; committed relationships vs. "falling in love"; dating as a way for some people to learn about others and relationships; statistics on teen pregnancy and parenting; marriage and lifetime commitments; relationship choices; value of communication, choices, trust and friendships in a relationship; mutual support for continued development as individuals in a relationship; influence of social and cultural environments on the way individuals learn about and express their sexuality; gays and lesbians can establish fulfilling committed relationships) 1.3. describe how to delay onset and reduce risks of potential life-long reproductive health problems. (REQUIRED TOPICS: importance of preventive health behaviors including regular check-ups, breast and testicular self- exams, prevention of unwanted pregnancy and sexually transmitted diseases) 1.4. analyze the relationship between public health polices, government regulations, health promotion and disease prevention. (REQUIRED TOPICS: issues such as abortion/contraception; definition of abortion as a medical intervention which terminates pregnancy and not a method of contraception; issues involved in choosing a method of contraception including advantages,	from home, school and community that provide valid sexuality and family life information for self and others. 2.2. evaluate factors which influence personal selection of health products and services. 2.3. evaluate situations requiring professional services and identify appropriate services. (REQUIRED TOPICS: identification of various professional services for human sexuality and family life issues; STDs; sexual decision-making; sexual dysfunction; sexual harassment or assault; victimization; sexual orientation, gender identity/expression; teen pregnancy and parenting; family crises:	sexual behaviors on self, others and the community. (REQUIRED TOPICS: impact of adolescent alcohol/drug use combined with sexual activity including assault; date rape; STDs, pregnancy, fetal and infant problems or mortality; importance of caring for one's reproductive health to assure health of future offspring; behaviors for perinatal (before, during, after pregnancy) health; factors and skills contributing to positive, consistent parenting; impact of sexual violence on an individual including sexual abuse, rape, and date rape) 3.3. design a plan with recommended strategies for individuals, schools and communities to reduce the incidence of sexual abuse, rape, and sexual harassment. 3.3. identify strategies which can aid in the prevention of unplanned pregnancy (REQUIRED TOPICS: role of education, sexual decision making, positive self-esteem, etc.)	community sexuality or family life issue resulting from the influence of media, culture, technology and other factors. (REQUIRED TOPICS: influence on thoughts, Feelings, behaviors related to human sexuality; how relationships are different than those modeled by media; relationship of personal and family values regarding sexuality; American society's diversity of sexual attitudes and behaviors; discrimination related to sexual orientation, gender identity/expression; various cultural beliefs and practices regarding dating, marriage, committed relationships; role of culture on person's decisions regarding sexual relationships and other human sexuality issues; how faith communities address various current human sexuality issues) 4.1. research how media, culture and technology influences thoughts, feelings and behaviors regarding human sexuality.	effectiveness of various communication methods for accurately expressing sexual health information and ideas. (Required Topics: ways to verbalize personal views about sexuality to partners, friends, family; how communication about sexual feelings, desires, and limits improves sexual relationships; negotiating decisions about sexual behaviors and limits; responsibility for quality of a relationship is shared by both dating partners; how teens can express their sexual feelings without engaging in sexual intercourse) 5.2. apply strategies to a selected situation that facilitate effective communication among individuals or groups. (REQUIRED TOPICS: skills to enhance relationships; barriers to communication with parents, friends and significant others regarding human sexuality	different strategies to use when making decisions related to sexual health, family life and potential risks of young adults. 6.2. design and evaluate a personal plan to promote sexual health. 6.3. evaluate the essential skills and strategies needed by a young adult to enable him/her to develop, modify and implement effective plans to achieve and maintain optimum sexual health. (REQUIRED TOPICS: making personal choices about appropriate roles for oneself; need for couples contemplating lifetime commitment to be realistic, honest and accepting of their partner prior to making decision to commit)	express opinions about human sexuality and family life issues. (Required Topics: people who are still denied equal treatment on the basis of gender even though laws prohibit this; how one can help fight STD/HIV by serving as an accurate source of information, by being a responsible role model and promoting healthy peer norms) 7.3. influence and support others in making positive health choices. (Required Topics: responsibility of adults and adolescents to help younger children avoid or deal effectively with negative influences (e.g. in the media) surrounding human sexuality; supporting others' positive choices about dating relationships; how one can be a support system to gay and lesbian individuals when they decide to "come out" 7.4. work cooperatively when advocating for healthy sexuality and advocating for rights of individuals with HIV/AIDS. (REQUIRED TOPICS: proposing solutions to reduce the incidence of homophobic acts such as discrimination and violence against homosexual and bisexual people because of their sexual orientation, gender identity/expression; understanding the impact of rape on the victim, the victim's family and society; long-term effects; portrait of rapists, reporting, investigation, trial, etc.) 7.5. evaluate community health services
	disadvantages; motivation, cost, effectiveness, comfort, religious beliefs, parent/family values; prevention of STDs, HIV transmission; laws regarding sexual harassment/sexual assault)			4.2. propose a plan for personal and community response to the media's portrayal of sexual issues.	issues; constructive ways of dealing with sexual harassment)		and systems currently in place and make recommendations for improving those systems and services with regard to sexual health and family life.

6. DISEASE PREVENTION AND CONTROL

HEALTH EDUCATION STANDARDS and DISEASE CONTROL and PREVENTION INSTRUCTIONAL OUTCOMES GRADES K - 4

Overall Instructional Goal: Students will recognize factors which contribute to disease and illness, their effect on the individual and society and how to prevent the transmission of communicable disease and the development of chronic disease.

Grades K-4 STUDEN	Standard 1: Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life. TS WILL DEMONSTRATE THE ABILITY	Standard 2: Students will demonstrate the ability to access valid health information and health-promoting products and services.	Standard 3: Students will demonstrate the ability to practice health-enhancing behaviors and reduce health risks.	Standard 4: Students will analyze the influence of culture, media, technology and other factors on health.	Standard 5: Students will demonstrate the ability to use interpersonal communication skills to enhance health.	Standard 6: Students will demonstrate the ability to use goal setting and decision making skills to enhance health.	Standard 7: Students will demonstrate the ability to advocate for personal, family, community and environmental health.
	1.1 describe relationships between personal health behaviors and individual well-being. (REQUIRED TOPICS: distinguish among illness, disease and health; the relationship between positive feelings of self and taking care of one's body; disease causing agents; factors which contribute to disease and infection; difference between communicable and non-communicable disease; how diseases and disorders affect feelings and actions) 1.2. identify indicators of physical health (REQUIRED TOPICS: importance of positive health habits; effects of heredity on health status) 1.3. describe the basic structure and functions of the body systems responsible for fighting illness. (REQUIRED TOPICS: immune system; other body systems e.g. cardiovascular system, etc.; common methods of disease transmission; how infections can spread through the body; effect of lifestyle on health) Overlaps: PSL, NUT, INJ	2.2. locate resources from home, school and community (health providers & other adults) that can provide valid information about disease control and prevention and the environment. (REQUIRED TOPICS : when & where to seek help)	3.1. identify responsible disease prevention behaviors. Communicable Disease: (REQUIRED TOPICS: healthy habits such as universal precautions; hand washing; avoiding contact with others' blood and body fluids; covering mouth when sneezing, etc. Non-Communicable Disease: (REQUIRED TOPICS: benefits of exercise and proper eating on heart health) Overlaps: PSL, NUT Environmental: (REQUIRED TOPICS: reduce, reuse, recycle practices; disposing of trash properly; avoiding picking up trash which can injure e.g. needles, broken glass; avoiding cigarette smoking) Overlaps: INJ, PSL, SAP	4.2. explain how media influences thoughts, feelings and behaviors about disease control and prevention including the environment 4.3. describe ways technology can influence disease control including the environment. (REQUIRED TOPICS: recycling technology; excessive product packaging as waste) 4.4. explain how information from community and family influences disease control and prevention including the environment.	5.4. communicate care, consideration and respect of self and others. (REQUIRED TOPICS: how to communicate health problems or concerns about one's body to parents, teachers, school nurse or other trusted adult; why HIV infected individuals need our respect and friendship.) 5.3. use healthy ways to express feelings about environmental health issues (e.g. dealing with second hand smoke in public places and automobiles.)	6.1. apply a decision-making process to a disease prevention and control issue. (REQUIRED TOPICS: how to select products which do not infringe on the environment)	7.1 discuss accurate information and express opinions about the relationship of products, services and money and environmental health issues. 7.3. describe roles of individuals and society for maintaining a healthy and safe environment. 7.3. identify community agencies that advocate for a safe and healthy environment. 7.5. work cooperatively when advocating for the environment.
